BLUEBERRIES MEDICAL CORP.

(formerly CDN MSolar Corp.)

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

For the year ended December 31, 2019

Dated April 29, 2020

The following Management's Discussion and Analysis (the "MD&A") of Blueberries Medical Corp. ("Blueberries" or the "Company") for the year ended December 31, 2019, as well as information and expectations concerning Blueberries' outlook are based on currently available information.

This MD&A should be read in conjunction with Blueberries' audited annual consolidated financial statements for the year ended December 31, 2019, as well as the audited annual consolidated financial statements of Blueberries Cannabis Corp. ("BCC" or the "Private Company") for the year ended December 31, 2018 (collectively, the "Financial Statements"). The Financial Statements and notes thereof are prepared in accordance with International Financial Reporting Standards ("IFRS") and its interpretations adopted by the International Accounting Standards Board ("IASB").

The MD&A, and the annual audited consolidated financial statements have been filed on SEDAR at www.sedar.com. Additional information can also be found on the Company's website at www.blueberriesmed.com.

This MD&A is prepared as of April 29, 2019. All dollar values are expressed in Canadian dollars, unless otherwise indicated.

HIGHLIGHTS

- On July 2, 2019, Blueberries executed a definitive agreement to acquire cannabis cultivation, processing, and manufacturing rights for 3.2M ft² property in Argentina from BBV Labs Inc. ("BBV Labs").
- On July 4, 2019, the Blueberries' common shares, which are traded in the United States (the "U.S.") under the symbol BBRRF, became eligible for electronic clearing and settlement through the Depository Trust Company.
- In August 2019, Blueberries received its first quotas from the Colombian Technical Quotas Group ("TQG"), to cultivate 1,300 psychoactive cannabis plants for the purposes of completing the Colombian Agricultural Institute ("ICA") agronomic evaluation tests.
- On August 30, 2019, Blueberries closed its over-subscribed, non-brokered private placement (the "Offering") of units (the "Units") at a price of C\$0.25 per Unit for total gross proceeds of C\$3,457,500.
- On September 12, 2019 Blueberries announced the formation of its medical & scientific committee to support management in the development of leading-edge formulations as well as its ongoing commercial and educational initiatives. The panel consists of internationally respected experts and researchers in pharmaceutical, chemistry, biology, engineering, biochemistry, and medical fields. The medical & scientific committee is focused on the development of innovative formulations to treat specific pathologies, as well as safe and effective treatment regimes. The committee will also assure the quality and certifications of the Company's medicinal-grade cannabis oil extracts, oversee the development of cannabis-derived products as well as develop medical education programs for physicians prescribing cannabis-based treatment plans to patients in Latin America.
- In September 2019, the Company received approval from ICA for the registration of five proprietary non-psychoactive cannabidiol (CBD) strains with the national cultivar registry and to commence commercial production of these strains.
- On October 11, 2019, Blueberries, in partnership with the Colombian Society of Pediatrics, hosted a full-day educational seminar for medical practitioners and other industry participants on the therapeutic benefits of medicinal cannabis and current industry developments. The seminar included a full day of presentations, workshops, panel discussions and networking opportunities providing attendees a comprehensive overview of industry developments and related matters including:
 - The current Cannabis Legislation in Colombia.

- The Physiology of the Endocannabinoid System and Clinical Pharmacology of the products that contain cannabinoids (natural and synthetic): guidelines for use, absorption, metabolism, dosage & excretion.
 - Candidates for the use of Cannabis Derived Drugs.
 - Refractory Epilepsy and other pathologies of interest.
 - Evidence in Chronic Pain Management.
 - Clinical Case Studies and Formulations.
- In October 2019, Blueberries partnered with the Van Uden International Center for Alternative Medicine (“Van Uden”) and the Juan N. Corpas University Foundation (the “Foundation”), two renowned Colombian organizations in the health and academic fields. The partnerships will facilitate the distribution of Blueberries’ products to a patient network of over 12,000 and bridge the gap between research and clinical practice by educating physicians on the applications and benefits of medicinal cannabis treatments.
 - On October 31, 2019 Blueberries closed the second tranche of the Offering of 685,059 Units for total gross proceeds of approximately C\$171,265, bringing the total gross proceeds from the Offering to approximately C\$3.63 million.
 - In December 2019 and January 2020, Blueberries commenced harvesting its first commercial crops at its 4-hectare Guatavita facility located in Bogotá Savannah, Colombia. The crops consist of the Company’s registered non-psychoactive cannabidiol (“CBD”) strains.
 - In February 2020 Blueberries commissioned its first extraction line at its 2,800 m² (30,138 ft²) extraction facility, located in Cundinamarca, Colombia. The facility uses supercritical CO₂ extraction technology to produce the highest quality cannabis oil and has been designed with the flexibility to also employ ethanol extraction technologies to match market demand. The installed Vitalis extraction line is the first equipment of its kind in Colombia having stainless-steel compressor and extraction vessels, built to stringent EU-GMP (European Union - Good Manufacturing Practices) standards. The Company’s facility is designed to comply with GMP standards to ensure standardization and consistency of production.
 - On April 17, 2020, the Ministry of Justice and Law of the Republic of Colombia granted to Blueberries a non-psychoactive cultivation license for the Company’s Zipaquira (Cogua) property, making it the Company’s second licensed cultivation facility to grow non-psychoactive cannabis in Colombia.

CORPORATE OVERVIEW AND UPDATE

Blueberries is a fully licensed cannabis producer in Latin America with a focus on cultivating, processing, and supplying medicinal-grade cannabis oil extracts and related products. Blueberries was incorporated in Canada on March 15, 2013 under the Business Corporations Act (British Columbia), and formerly operated under the name CDN MSolar Corp. (“CMS”). The common shares of the Company are listed on the Canadian Securities Exchange (the “CSE”) under the symbol “CNSX:BBM”.

On February 5, 2019, Blueberries (then being CMS) completed a transaction (the “Transaction”) with BCC, a private company registered under the Ontario Business Corporations Act. The Private Company’s wholly owned subsidiary, Blueberries SAS (“BBSAS”) is a licensed producer and distributor of medicinal cannabis and cannabis-derived products in Colombia. The Transaction constituted a reverse asset acquisition in accordance with IFRS, whereby the shareholders of BCC took control of CMS. Following the completion of the Transaction, CDN MSolar Corp. legally changed its name to Blueberries Medical Corp.

References within this MD&A to the “Company” or “Blueberries” for periods, dates and/or transactions prior to the Transaction are in reference to the Private Company, as the corporate entity of interest pre-Transaction. Alternatively, references within these financial statements to the “Company” or “Blueberries” for periods, dates and/or transactions after the Transaction are in reference to Blueberries Medical Corp.,

as the corporate entity of interest post-Transaction. The comparative periods reflected in the condensed interim consolidated financial statements and within this MD&A are those of the Private Company, as the financials are a continuance of BCC.

Recent Developments - Coronavirus ("COVID-19") Pandemic, Its Impact and Influence

Early 2020, there was a global outbreak of coronavirus disease ("COVID-19"), which has had a significant impact on businesses through the restrictions put in place by the Colombian, Canadian, provincial and municipal governments regarding travel, business operations and isolation/quarantine orders.

Blueberries continues to closely monitor and respond where possible to the ongoing COVID-19 situation. As the global situation continues to change rapidly, ensuring the well-being of our employees remains one of our top priorities. Our facilities in Colombia remain open and operational with heightened measures in place to protect the health and safety of employees, vendors, partners, and their families. The Company is committed to enhancing these measures and implementing other necessary practices as the situation warrants.

At this time, it is unknown the extent of the impact the COVID-19 outbreak may have on the Company as this will depend on future developments that are highly uncertain and that cannot be predicted with confidence. These uncertainties arise from the inability to predict the ultimate geographic spread of the disease, and the duration of the outbreak, including the duration of travel restrictions, business closures or disruptions, and quarantine/isolation measures that are currently, or may be put, in place by Colombia, Canada and other countries to fight the virus. While the extent of the impact is unknown, we anticipate this outbreak may cause reduced customer demand, supply chain disruptions, staff shortages, and increased government regulations, all of which will negatively impact the Company's business and financial condition.

COVID-19 has increased the Company's risk profile significantly, notably due to the following:

- a potential curtailment or total shut down of operations by government
- potential loss of manpower at its facilities
- potential of a Blueberries employee falling ill and causing a disruption to the operations
- the ability to procure and transport critical supplies and parts to the facilities and
- the ability of the Colombian operations to transport finished products to clients to generate revenues.

If any of these events were triggered, the result could be a complete shutdown of the Colombian operations for an undetermined period.

To minimize this risk, the following actions have been taken: a policy has been instituted supporting employees to work from home where practical; preliminary screenings at facilities, any employees or contractors showing potential signs of COVID-19 will be placed into self-isolation; special arrangements at the facilities have been implemented to maximize social distancing.

The Company is treating the threat of a COVID-19 outbreak very seriously. A care-and-maintenance plan has been prepared and would be executed in the event of an outbreak at one of the facilities.

The Company has entered into a cash preservation mode; all non-critical expenditures have been deferred for the foreseeable future. Should the COVID-19 cause a prolonged interruption of operations, this could impact the Company's ability to secure financing required to progress its strategic initiatives and/or could result in an impairment of asset values.

Colombia Operations

Blueberries' nursery and propagation centers are located in the municipalities of Guatavita in the department of Cundinamarca. In Guatavita, Blueberries completed construction of new open-air greenhouses which are now fully operational, increasing initial cultivation area by approximately 40% to 140,000 ft². Upgrades to facility infrastructure, including irrigation and electrical systems, water reservoirs and propagation facility are continuing.

With the Colombian government's resolution of unit of agronomic evaluation issued during Q1 2019, of the 142 strains that have been registered with the Colombian Agricultural Institute ("ICA"), Blueberries has successfully registered five proprietary non-psychoactive cannabidiol (CBD) strains in Q3, 2019 and started its first commercial cultivation.

Blueberries currently has 1.3 hectares (140,000 ft²) of open-air greenhouses built, of which approximately 75% is operational. The remaining space will enter into operation according to the evolution of the COVID-19 pandemic.

By the end of 2020, with the build-out of additional outdoor area through joint ventures in the Zipaquirá property, the Company's cultivation footprint in Colombia will increase to approximately 3 hectares (~330,000 ft²).

Cannabis crops are currently growing in over 55,000 ft² of open-air greenhouses and outdoor at the Guatavita property, cultivation and experimental harvesting now underway along with additional planting in newly constructed greenhouses. In April 2020, over 20,000 grams of dried flower has been harvested. Yield performance to date has been in line with expectations.

The Company is also actively negotiating with local contract growers to further increase its cultivation capacity. It is anticipated that contract growing capacity will increase to approximately 30 hectares by 2023.

Initial extraction line with scalable capacity to process up to 70,000 kg/year of dried flower is currently being built with EU-GMP standards, with the objective of becoming an EU-GMP compliant extraction operation. The extraction facility is in an industrial park, with capacity to scale up its extraction, processing and manufacturing capabilities up to six extraction lines.

The Company continues working in the implementation of ISO 9001 and we expect to be certified in Q3, 2020.

Formulation, branding and packaging for Blueberries CBD cosmetic products has been finalized and the pilot lot of products have been manufactured at a laboratory. In early October 2019, Blueberries CBD cosmetics were introduced to participants at a sector conference in Bogotá. The commercial launch of Blueberries CBD cosmetics products in Colombia and potentially other countries in Latin America is expected to occur in 2H, 2020. The five approved CBD cosmetics products include face cream, lip balm, body cream, beauty balm, and cannabis oil shampoo.

On February 13, 2019, Blueberries entered into a letter of intent for a joint venture with Harmony and Life SAS, operating as "El Manantial" medical centers. The joint venture will further the development and commercialization of Blueberries' medicinal cannabis products through El Manantial's rapidly growing patient base and collaboration with El Manantial's team of physicians, pharmacists and technicians with deep expertise in a variety of medical areas. It will also provide a direct distribution channel to an established and rapidly growing patient base by selling exclusively Blueberries' cannabis-derived products. In early 2020, Blueberries and El Manantial developed a treatment-focused medical education program designed to assist physicians in prescribing cannabis-based treatment plans to patients.

Zipaquirá Property

Acquired by the Company in February 2019, the Zipaquirá property is a 37-acre (15 hectares) agricultural property in the Bogotá Savannah. The Zipaquirá property consists of fertile land ideally located approximately 24km from the Company's existing 430,000 sq. ft. (4 hectares) Guatavita production facility and 25km from the Company's state-of-the-art extraction facility. The Zipaquirá property has ideal growing conditions to cultivate consistent, high quality dried flower. There is supply of natural spring water and the area's abundant access to natural sunlight is expected to result in electricity costs that are significantly below market. The water source permitting for large scale cultivation and title transfer of the land are pending.

On February 15, 2019, Blueberries announced that had entered into a letter of intent for a joint venture with India Colorada SAS, one of the leading Colombian artisanal brewers and producer of the oldest craft beer in Colombia, Cerveza Colón, to research, develop and commercialize non-alcoholic cannabis-based beverages. This project has been put on hold as the regulation for cannabis beverages in Colombia is not active yet.

The planned joint venture with India Colorada SAS is expected to undertake the research, development and commercialization of non-alcoholic cannabis-based beverages with the goal of being first to market in Latin America. Pursuant to the joint venture, both companies will apply their respective expertise toward the research and development of beverages containing tetrahydrocannabinol (THC), the psychoactive chemical compound in cannabis, as well as cannabidiol (CBD), the non-psychoactive compound. The joint venture is expected to commercialize newly developed cannabis-based beverages through India Colorada's established and growing distribution channels in addition to Blueberries' distribution channels. The joint venture will make decisions regarding commercialization of the products in different countries where permitted by regulation on an individual market basis. Pursuant to the terms of the letter of intent, the parties intend to complete the development of new products and commercialization plan over the next 12 months. For the deal to proceed, Blueberries would have to provide the joint venture with up to \$300,000 USD for the research and development phase. Upon completion the R&D process (12 months after the execution), depending on the results of the investigation, the Company would sign the definitive agreement.

On April 15, 2019, Blueberries announced that it had signed a definitive joint venture agreement (the "Agreement") with the International Research Center on Cannabis and Mental Health ("IRCCMH" or the "Center") for the development of medical education programs for physicians and patients in Latin America and product formulation.

IRCCMH is a leading research and academic organization in the cannabis sector with extensive experience in cannabis research and education, pharmacology, product formulation and the efficacy of cannabis-based treatments. Based in New York and aligned with the Silver School of Social Work at New York University, IRCCMH is comprised of renowned scientists, educators and clinicians and was created to bridge a gap between research and clinical practice. IRCCMH also creates education programs for physicians and patients and acts as advisor to several state-sponsored medical cannabis programs and has guided state regulators to create and implement cannabis programs in Pennsylvania, Delaware, New Jersey, Utah, California and other states.

On June 5th, 2019, Blueberries announced that that it had entered into a letter agreement (the "Letter Agreement") to become a strategic supplier of medical cannabis products to Canurius UG ("Canurius"), for the sale and distribution of cannabis products in Germany with the potential for expansion into Austria, Switzerland and the Netherlands. Pursuant to the terms of the Letter Agreement, Blueberries will provide Canurius with approximately 100 litres (100 kg) of cannabis oil extract per month for an initial 12-month term. The completion of the transaction is subject to and conditional upon satisfactory legal and financial due diligence and the execution of a definitive agreement.

Canurius is an independent cannabis distributor with a network of 100 pharmacies in Germany that is expected to expand to approximately 1,000 pharmacies by 2020. The agreement provides for the import, sales and distribution of Blueberries' CBD based cannabis products for health and wellness purposes, including extracts, finished products, cosmetics, dietary supplements and other medicinal-grade cannabis products under German regulations by Canurius for its authorized market and territory. Canurius is also currently in the process of negotiating with large German pharmacy wholesalers to increase its market penetration to more than 10,000 pharmacies.

On June 11th, 2019 Blueberries and SLANG Worldwide Inc. announced that the companies have entered into a memorandum of understanding ("MOU") to develop a strategic partnership ("Strategic Partnership"). Through this partnership, Blueberries may license SLANG's extensive portfolio of renowned cannabis brands and leverage SLANG's industry leading know-how and intellectual property to process and formulate cannabis products in Colombia and Argentina. The MOU was negotiated at arm's length.

Blueberries and SLANG will also collaborate on the commercialization of products into other Latin American countries as regulatory framework is implemented. Latin America is among the world's fastest-growing cannabis markets with expected cannabis spending of \$12-billion USD by 2028 (Prohibition Partners) and an estimated 68 million potential medical cannabis patients currently (Quintiles IMS).

The strategic partnership includes:

- The exclusive license to Blueberries of select SLANG propriety standard operating procedures (“SOPs”) pertaining to medical cannabis and cannabis derived products in Colombia and Argentina.
- An exclusive right of first refusal to sell and distribute select SLANG products in Colombia and Argentina.
- Collaboration on new and existing products.
- On-site consulting services to facilitate the integration of the SOPs at Blueberries' manufacturing facilities

Argentina Operations

On March 25, 2019, the Company entered into a binding letter of intent agreement to purchase 75% of BBV Labs' shares to acquire cannabis cultivation, processing, manufacturing, export and other rights in Argentina, and in return issue 16,000,000 Blueberries common shares to owners of BBV Labs. In accordance with the terms of the LOI, Blueberries made an advance of \$300,000 USD to the Argentinian state-owned company Cannabis Avatara, S.E. (“Cannava”) on behalf of BBV Labs as contribution to the joint venture. Pursuant to a definitive agreement, BBV Labs has entered into a joint venture with Cannava to develop and cultivate cannabis on a 3.2 million ft² (74 acres or 30 hectares) prime agricultural property. Cannava will contribute the land to the joint venture as well as all required permits and authorizations necessary to import seeds, cultivate, grow and harvest cannabis, process cannabis and extract cannabis oil and other derivative products for scientific, medicinal and therapeutic purposes and to export cannabis and derivative products and import and export related equipment and products.

The first phase of the Joint Venture project will be a Pilot Cultivation Program (the “Pilot Project”) with an estimated capital requirement of \$750,000 to \$1,000,000 and consists of the preparation and cultivation of cannabis on a 50,000 ft² (0.46 hectare) area on public lands provided by Cannava with the goal of producing 4 million grams (4,000 kg) of dry cannabis flower. The Pilot Project will also evaluate and characterize cannabis seeds and strains that are ideal for the climate conditions of Jujuy, and document the proposed operating procedures, technical processes, strains and products that the Joint Venture is seeking to produce. The Company is currently evaluating the timing of the Pilot Project.

Highlights Include:

- The rights to cannabis licenses in Argentina acquired by Blueberries are amongst very few such agreements currently in place to supply cannabis products to the Argentinian population exceeding 44 million people. The acquisition also expands the Company's production footprint internationally and may provide additional export opportunities to other countries with evolving cannabis regulations.
- Blueberries to build a large-scale modern cultivation facility and processing center of excellence in Argentina.
- Cannava will contribute all licenses/permits and authorizations necessary to import seeds, cultivate, grow and harvest cannabis, process cannabis, extract cannabis oil and other derivative products, export cannabis and derivative products, and import/export equipment and products.
- Cannava will grant access to utilize 3.2 million ft² (74 acres or 30 hectares) of prime agricultural land for the cultivation and growth of cannabis in Jujuy Province, Argentina, ideally situated in an area with robust modern infrastructure including fresh water, modern power supply and a nearby airport, with additional land available for potential future expansion.
- Cannava will contribute all cooperation agreements with the National Institute of Agricultural Technology (INTA), Ministry of Security, Ministry of Public Health, National Council of Scientific and Technological Investigations (CONICET) and other regulatory and technological Argentinian authorities as required.

On April 4, 2019, the Company announced that that it has commenced the Phase 1 planning process with Cannava in connection with the cooperation agreement entered into under the scope of the “Provincial

Program of Promotion of the Cultivation and Production of Cannabis with Scientific, Medicinal and Therapeutic Purposes of the Province of Jujuy in Argentina” (the “Joint Venture”), through its agreement with BBV Labs.

On July 2, 2019, Blueberries entered into a definitive share purchase agreement with BBV Labs, subject to certain closing conditions. The agreement allows Blueberries to acquire cannabis cultivation, processing, manufacturing, and other rights in Argentina through a joint venture agreement between BBV Labs and Cannava.

On November 29, 2019 Blueberries and BBV Labs entered into an amending agreement, whereby the closing of the definitive share purchase agreement has been postponed to November 30, 2020. In case either party decides not to proceed with the closing by November 30, 2020, the parties agreed that the indemnification payable shall be liquidated damages in an amount equivalent to: (i) the average trading value of the shares of BBM during the three (3) calendar months preceding such date, (b) multiplied by 16,000,000, (c) plus twenty five percent. Any delay in closing or payment of the liquidated damages after November 30, 2020 will generate interest at a rate of 5% per year.

The management is currently evaluating the timing of the commencement of the Pilot Project.

Production Licenses

The legalization of the cultivation of cannabis as medicinal Cannabis was based on Law 1787 of 2016 enacted by Colombian Congress, Decree 613 of 2017 the (“Decree”) and regulatory resolutions (577, 578 and 579 of August 8, 2017 enacted by the Ministry of Justice and resolutions 2891 and 2892 of 2017 enacted by the Ministry of Health) which formed a legal framework that regulates the actions of any company in Colombia working with cannabis for medical and scientific purposes, including the cultivation, production, and domestic and international distribution of cannabis, cannabis seeds, High THC Medicinal Cannabis, and Low THC Medicinal Cannabis extracts.

Decree 613 of 2017 specifically outlines the different types of cannabis licenses and general requirements for issuing these licenses. The new requirements from this Decree to obtain a license include providing certification of land use, shareholder structure information, a farming crop plan and manufacturing projected for five years, and registry of plant cultivars with the ICA. The Decree also outlines that the license holder must inform the Ministry of Justice and the National Narcotics Fund of non-psychoactive seeds that become psychoactive either during agricultural evaluation or seed cultivation. Additionally, the Decree outlines new events for termination of licenses including not obtaining at least one quota for each year of licenses and beginning cultivation or commercialization without the ICA registry of plant cultivars.

The Company obtained licenses to grow, cultivate, distribute locally and internationally medical cannabis with high concentrations of Tetrahydrocannabinol “THC” (>1% THC) and medical cannabis with low concentrations of THC (<0.1% THC). Below is a summary of the licenses, their function, status and application.

Licenses	Function	Grant Date	Application
Non-psychoactive cannabis cultivation	<ul style="list-style-type: none"> Seed production for planting Grain production Manufacture of derivatives Scientific purposes 	Mar. 15, 2018	<ul style="list-style-type: none"> Less than 1.0% THC Production of low THC extracts Domestic and international distribution
Manufacture of cannabis derivatives	<ul style="list-style-type: none"> National use Exportation Scientific Research 	Aug. 17, 2018	<ul style="list-style-type: none"> Manufacture, Produce, Commercialize and export psychoactive and non-psychoactive cannabis derivatives
Psychoactive cannabis cultivation	<ul style="list-style-type: none"> Seed production for planting Grain production Manufacture of derivatives Scientific purposes 	Oct. 24, 2018	<ul style="list-style-type: none"> Production of more than 1.0% THC and high THC extracts. Domestic and international distribution
Seeds	<ul style="list-style-type: none"> Marketing or delivery Scientific purposes 	Dec. 3, 2019	<ul style="list-style-type: none"> Marketing: Buying and selling of seeds

Changes in Colombian Cannabis Regulations

It is expected that in the near future the Ministry of Health and Social Protection of Colombia is going to publish a modification to Decree 613 of 2017, which is the regulation that guarantees access to cannabis for medical and scientific use. The main changes proposed are related to: actions to improve monitoring and control of cannabis according to international agreements, licensing and quota requirements, especially in fabrication of non-psychoactive derivatives, new regulations on international trade such as enabling use of duty free zones for production of cannabis derivatives, and finally including actions to strengthening small and medium national growers and marketers of medicinal cannabis.

In order to guarantee the juridical safety, the new Decree will have no retroactive effect, grandfathering existing and previous licence holders and applications to be processed under current regulations.

Directors and Management Members

The Board of Directors and Management Members of Blueberries are constituted as follows:

Board of Directors

Christian Toro, Executive Chairman
Dr. Andres Vidal
Francisco Sole
Paola Castañeda
Patricio Villalba
Catherine Lathwell
Matthew Bajurny
Fabio Valencia

Management

Camilo Villalba – Chief Executive Officer
Ian D. Atacan – Chief Financial Officer
Eduardo Molinari – Chief Marketing Officer

- On March 19, 2019, Mr. Fabio Valencia Cossio was appointed to the Board of Directors. Mr. Valencia is a former Colombian Minister, Senator, and Ambassador to Italy with extensive strategic international business experience. Since his tenure with the government, Mr. Valencia has been very active in the private sector where he currently provides legal and commercial consulting services to an extensive group of large multinational companies looking to grow their operations in South America. He is currently engaged with consumer product companies including Diageo plc, Pernod Ricard S.A. and Bacardi Limited. Mr. Valencia has also advised Ribera Salud Spain, a leading provider of health insurance services and Indra Sistemas S.A., Grupo Tradeco, Gilat Satellite Networks, Pacific Rubiales and Gran Colombia Gold.
- On April 17, 2019, Mr. Eduardo Molinari was appointed as Chief Marketing Officer of the Company. Mr. Molinari is a former executive of Abbott Laboratories (NYSE: ABT) (“Abbott”) and AbbVie Ltd. (NYSE: ABBV) (“AbbVie”). Mr. Molinari will lead the development and implementation of the Company’s marketing strategies, directing these initiatives in the local and international markets. Mr. Molinari has more than 25 years of experience in the pharmaceutical industry, having held executive leadership positions in countries across Latin America, most recently VP Region North – Latin America of AbbVie until December 2018. In 2012, when Abbott spun out its pharmaceutical business to form AbbVie, Mr. Molinari left Abbott to establish AbbVie in Latin America where he played a key role in the growth of the company in the region. His business expertise is combined with deep experience in R&D both in academia at Northwestern University Medical School in Chicago and in the pharmaceutical industry. Mr. Molinari has shown continued growth as a leader in the industry with a commitment to bringing healthcare solutions to patients globally.
- On June 24, 2019, Mr. Ian D. Atacan was appointed as Chief Financial Officer of the Company. Mr. Atacan was former CFO of Natura Naturals Inc. (acquired by Tilray, Inc. NASDAQ: TLRY). Mr. Atacan has extensive experience in national and international public companies, mainly in business strategy development, valuations of M&A, debt and equity financing, divestitures and investment transactions, financial modeling, project management, competitive analysis and developing strategic investment recommendations. Mr. Atacan was previously the CFO of Global Atomic Corporation (formerly

Silvermet Inc. TSX: GLO). Mr. Atacan is a Chartered Professional Accountant (CPA, CMA), MBA (London, UK) and Electrical & Electronics Engineer (BSc. -EEE). Mr. Atacan began his career working for Procter & Gamble.

- On December 16, 2019, Mr. Camilo Villalba was appointed as Chief Executive Officer of the Company. Mr. Villalba is a co-founder of Blueberries and has been leading the corporate and operational areas since before the Company became the first Colombian cannabis producer listed on the Canadian Securities Exchange. An entrepreneur and business strategist, Mr. Villalba began his career in the energy sector, providing consulting services to diverse companies in Latin America. Before founding Blueberries, Mr. Villalba was a private equity investor and supported the creation and growth of ventures in different Latin American markets, including Colombia and Mexico. Mr. Villalba has lived and worked in several cities around the globe, developing a robust international business network.

DISCUSSION OF OPERATIONS

Selected Financial Information

The following table summarizes results of operations of the Company for the year ended December 31, 2019. The results from the date of incorporation of the Company, September 5 to December 31, 2018 are also included for reference purposes:

<i>(Expressed in Canadian Dollars)</i>	Year ended December 31, 2019	Period from September 5, to December 31, 2018
Revenues	-	-
Expenses		
Pre-operating expenses	(1,042,256)	(137,802)
General and administrative expenses	(5,462,462)	(395,318)
Depreciation and amortization	(294,129)	(5,816)
Listing expense	(4,004,312)	-
Other income (expense)	2,396	(8,896)
Foreign exchange gain	12,887	12,179
Net loss	(10,787,876)	(535,653)
Other Comprehensive Loss		
Foreign currency translation adjustment	(378,766)	(4,689)
Comprehensive loss	(11,166,642)	(540,342)
Loss per share - basic and diluted	(0.099)	(0.011)

	As at December 31, 2019	As at December 31, 2018
Total assets	9,786,447	1,867,277
Total liabilities	1,711,035	742,881
Total equity	8,075,412	1,124,396

Revenues

The Company did not have revenues during the year ended December 31, 2019. Since the Company has no revenue from operations, a breakdown and discussion of material costs have been presented below.

Pre-operating expenses

Pre-operating expenses are non-capital expenditures relating to Blueberries' cannabis farming and cultivation operations. During the year ended December 31, 2019, \$1,042,256 of pre-operating expenses were incurred. The expenditures have been broken down by the specific nature of the costs as seen below:

	Year ended December 31, 2019	Period from September 5, to December 31, 2018
Salary, wages, benefits	752,942	123,314
Supplies, spare parts and equipment	109,401	2,437
License costs	28,347	349
Facilities and improvements	22,682	2,487
Laboratory	16,710	-
Consultants	21,933	7,033
Fuel and oil	12,917	915
Transportation	9,738	-
Utilities	7,947	481
Other	59,639	786
Total pre-operating expenses	1,042,256	137,802

General and Administrative ("G&A") Expenses

Total G&A expenses of \$5,462,462 were incurred for the year ended December 31, 2019. The expenses from the date of incorporation of the Company, September 5 to December 31, 2018 are also included for reference purposes. The nature of G&A expenses for the year ended December 31, 2019 is as follows:

	Year ended December 31, 2019	For the period from September 5, 2018 to December 31, 2018
Share based compensation	2,450,488	-
Marketing and investor relations	670,327	-
Director and management fees	494,847	-
Legal	389,350	171,800
Consulting	356,729	-
Salary, wages, and benefits	406,528	-
Audit and accounting	241,738	132,200
General office	191,430	860
Travel	106,765	-
Filing and transfer agent fees	69,487	58,597
Insurance	37,147	-
Other	47,626	31,861
Total general and administrative expenses	5,462,462	395,318

Share based compensation

The Company's stock option plan provides for the issue of stock options to directors, officers, employees, contractors and consultants, who are all considered related parties to the Company. The plan provides that stock options may be granted up to a number equal to 10% of the Company's outstanding shares. The plan also indicates that the maximum number of shares which may be issued to any one insider and his or her associates under the plan, together with any other previously established or proposed share compensation arrangements, within a one-year period shall be 5% of the shares outstanding at the time of the grant. Vesting and other terms and conditions are determined by the Board of Directors at the time they are granted.

Non-cash share-based compensation expense was \$2,450,488 for the year ended December 31, 2019. The entire amount has been expensed in the income statement of the Company.

Marketing and investor relations

During the year ended December 31, 2019, the Company incurred \$670,327 in marketing and investor relations expenses. These costs were incurred initially in Q1 2019 to begin trading on the CSE and later, mostly in Q2 2019, in order to help promote the Company and raise capital.

Director and management fees

During the year ended December 31, 2019, the Company incurred \$494,847 in director and management fees. These are costs incurred specifically for certain directors and officers of the Company for services provided to Blueberries either from themselves personally or through a related entity.

Legal fees

The Company incurred \$389,350 in legal services provided for the year ended December 31, 2019. The fees relate to private placements, ongoing administrative matters and legal counsel regarding the structure and format of potential business ventures the Company is pursuing.

Consulting services

Blueberries enters into consulting agreements for advice and assistance on compliance with EU-GMP standards, quality management, facility development, financial and technical counsel, human resources services, and regulatory compliance. Consulting agreements are typically no longer than one year and are entered into for the purposes of increasing efficiency and productivity of the Company's operations. During the year ended December 31, 2019, total consulting fees of \$356,729 were incurred.

Salary, wages, and benefits

Salary, wages, and benefits include payroll, training, benefits, and severance costs of employees in Colombia. For the year ended December 31, 2019, total salary, wages and benefits was \$406,528.

Auditing and accounting fees

Audit and accounting fees include cost of services provided by the Company's external auditor and \$100,000 fees from a third-party contractor for accounting and taxation services that were provided until October 2019.

General office expenditures

General office expenditures were \$191,430 for the year ended December 31, 2019. General office expenses include office and equipment rent, utilities, communication, and cleaning services, which are expensed as incurred.

Depreciation and Amortization

Depreciation and amortization of Property, Plant, and Equipment ("PP&E") and intangible assets are dependent upon estimated useful life of an asset, which is the period over which an asset is expected to be available for use. PP&E is depreciated through profit and loss over an asset's estimated useful life. Agricultural facilities and equipment are estimated to have useful lives between 3 – 5 years, while buildings are estimated to have useful lives of 10 years. Assets under construction are not subject to depreciation until they are available for use. Indefinite life licenses are not amortized but are tested for impairment annually, whereas finite useful life licenses are amortized through the income statement.

Right-of-use assets are also depreciated on a straight-line basis over the lesser of the asset useful life and the lease term. As at December 31, 2019, the Company had four right-of-use assets two of which were relating to rural property leased and depreciated over a 6-year lease term. The remaining two were leases of the extraction facility and a vehicle, with terms of five and three years, respectively.

During the year ended December 31, 2019, the Company incurred total depreciation and amortization expenses of \$294,129.

Listing Expense

The listing expense incurred by the Company was a one-time, non-cash expense of \$4,004,312. As detailed in the Financial Statements, the purchase price paid for the acquisition of CMS was the fair value of the 7,392,772 outstanding CMS shares valued at \$0.48 per share for a total of \$3,548,531. The fair value of the shares was allocated to the fair value of the net liabilities acquired of \$444,182 with the difference being recognized as a non-cash listing expense on the completion of the Transaction. Legal and other professional fees relating to the reverse takeover of \$11,599 were also included as part of the total listing expense.

Foreign Exchange

The Company incurred a foreign exchange gain of \$12,887 for the year ended December 31, 2019. The gains and losses are due to fluctuating foreign currency rates causing additional inflow or outflow of working capital required to pay foreign currency transactions. The Company also incurred a currency translation adjustment of \$378,766 for the year ended December 31, 2019 due to the Colombian subsidiaries' assets and liabilities being translated at the reporting period exchange rate, while revenues, expenses and cash flows are translated at the average exchange rate for the year ended December 31, 2019.

SELECTED QUARTERLY FINANCIAL INFORMATION

The table below presents the quarterly financial highlights since the Company's incorporation on September 5, 2018. The comparative periods reflected in the table below are those of the Private Company, as the financials are a continuance of BCC.

	Revenues	Net loss	Net loss per share
2019			
Q4	-	(1,552,761)	(0.005)
Q3	-	(2,193,973)	(0.019)
Q2	-	(1,649,978)	(0.015)
Q1	-	(5,391,164)	(0.060)
2018			
Q4	-	(463,422)	(0.0100)
Q3	-	(72,231)	(72,231.0000)

Since the comparable company, BCC, was incorporated on September 5, 2018, there is no historical financial information prior to Q3, 2018. The Company's Q3, 2018 net loss per share was equal to the total net loss as at September 30, 2018, the Company had only one share outstanding.

LIQUIDITY AND CAPITAL RESOURCES

The principal activities of the Company used to be the cultivation, production and distribution of blueberries, which transitioned into cultivating, producing and distributing medicinal cannabis. These activities are financed through the completion of equity transactions such as equity offerings. There is no assurance that future equity capital will be available to the Company in the amounts or at the times desired by the Company or on terms that are acceptable to it, if at all. See discussion of common risk factors below.

The Company has negative cash flow from operations and therefore must utilize its current cash reserves, to maintain its capacity to meet ongoing operating activities. The negative cash flows from operations was driven by the fact that the Cannabis business is in the development phase with no revenue to positively affect cash flows. Net cash used in operating activities was \$4,093,959 for the year ended December 31, 2019 and was mainly attributed to paying off outstanding liabilities recorded in accounts payable in 2018 and ongoing operating, consulting and investor relations agreements, which have been expensed in the income statement of the Company. Trade accounts payable and accrued liabilities had a balance of \$793,399 as at December 31, 2019. This balance was classified as a current liability as all amounts are due within 12 months time. As of December 31, 2019, the Company's working capital is \$1,778,494, indicating the Company has current assets available to meet liabilities as they come due.

Net cash used in investing activities was \$4,957,392 for the year ended December 31, 2019. This was mainly attributed to purchases of property, plant, and equipment assets of \$2,254,423 and the purchase of 15 additional hectares of farmland for \$1,994,250 and advances towards other property, plant and equipment. Also, during 2019, the Company advanced \$389,640 (US\$300,000) to Argentinian joint venture, further contributing to the cash used in investing activities.

Net cash generated from financing activities for the year ended December 31, 2019 totaled \$11,672,040. This is mainly attributed to proceeds from subscription receipts which converted into shares and warrants as at the date of the RTO Transaction and the Offering in August. During 2019, \$7,143,986 was received from the issuance of shares, net of costs and \$4,389,053 from warrants, net of costs. Additionally, 1,464,000 warrants were exercised, bringing in a total of \$585,600 proceeds. The increase in proceeds from financing activities was partially offset by payments made on related party notes of \$243,504.

The Company's liquidity risk from financial instruments is minimal as excess cash is held in bank accounts with reputable financial institutions.

While the Company has no amount of cash flow from operations, management believes there is sufficient cash resources to meet its administrative overhead costs. The Company will require additional funding to advance its extraction facility build-out through development and into production and for working capital as it starts generating revenue. The Company will continue to pursue opportunities to raise additional capital through debt and equity markets to fund its future growth and operating activities. Although the Company has been successful in raising funds to date, there can be no assurance that adequate funding will be available in the future, or under terms favourable to the Company. Should the COVID-19 cause a prolonged interruption of global markets, this could impact the Company's ability to secure financing required to progress in building out the extraction facility and/or could result in an impairment of asset values.

Management of Capital

The Company's objectives when managing capital are to ensure the Company will have sufficient financial capacity, liquidity, and flexibility to fund the Company's operations, growth, and ongoing developmental activities. The Company is dependent upon funding these activities through a combination of available cash, debt and equity, which it considers to be the components of its capital structure as outlined below.

	December 31, 2019	December 31, 2018
Shareholders' equity	8,075,412	1,124,396
Cash	2,666,191	412,405
Working capital, excluding cash	(887,697)	(741,466)

OFF-BALANCE-SHEET ARRANGEMENTS

As of the date of this MD&A, the Company does not have any off-balance-sheet arrangements that have, or are reasonably likely to have, a current or future effect on the financial performance or financial condition of the Company, including, and without limitation, such considerations as liquidity and capital resources.

OUTSTANDING SHARE DATA

As at the date of this MD&A, the outstanding common shares, stock options, and warrants are as follows:

Common shares outstanding	123,701,831
Stock options	12,035,000
Purchaser warrants	30,666,059
Finder warrants	3,454,103
Fully diluted shares outstanding	169,856,993

COLOMBIA OPERATING ENVIRONMENT

Competitive Conditions and Environment

Below is a summary of certain geographic, political, and economic considerations relevant to carrying on business in Colombia but does not purport to be a comprehensive statement of such considerations. It is included for background information only and should not be relied on or used for any other purpose.

Colombia is a representative democracy with a central government and separation of powers. The country has three branches of government: executive, legislative and judicial. In the executive branch, the President and Vice-President are elected to a maximum of four-year terms. The President acts as both the head of state and head of government. The legislative branch is a bicameral legislature currently consisting of a 108 member Senate and a 171 member House of Representatives. Both chambers are directly elected for four-year terms. Finally, Colombia's judicial system is composed of the following institutions: Supreme Court, Prosecutor General Office, Superior Council of the Judiciary, Constitutional Court and Council for Administrative Law Jurisdiction. The Supreme Court is the highest court of criminal, civil and labour law and judges are appointed by the Supreme Court from a shortlist submitted by the Superior Judicature Council. Supreme Court judges are appointed for eight-year terms.

Colombia is the third-largest country in Latin America after Mexico and Brazil, with an estimated population of nearly 50 million people. Despite being one of the 30 largest countries in the world, Colombia's population density is sparse, with just 41 people per square kilometer (106/square mile), which ranks 173rd in the world. Colombia also has the third-largest Spanish-speaking population in the world after Mexico and the United States.

In recent years, Colombia has undergone a remarkable transformation, making great strides in restoring security and stability and advancing policies that have led to significant social progress and economic growth. Colombia is Latin America's oldest and most stable democracy. For more than a century, the country has experienced peaceful changes of government every four years as citizens have elected government representatives in free and fair elections in a political environment that proudly supports full freedom of the press.

After peace negotiations in Cuba, the Colombian government of President Juan Manuel Santos and guerrilla of FARC-EP, Colombia's largest guerrilla group, announced a final agreement to end the conflict. However, a referendum to ratify the deal was unsuccessful. Afterward, the Colombian government and the FARC-EP signed a revised peace deal in November 2016, which the Colombian congress approved. Notwithstanding the foregoing, portions of the countryside are still under the influence of certain guerrilla factions, such as the Ejército de Liberación Nacional or "ELN", another guerrilla armed group, which has been operating in Colombia for the past 52 years. The ELN and the Colombian government are currently conducting peace talks and negotiations.

Defense of Competition and Antitrust Regulation

Colombia's competition laws prohibit, among other activities:

- Anti-competitive horizontal arrangements: any contract, covenant, meeting of the minds, agreed or consciously parallel practice between two or more competitors, which has the purpose or likely effect of lessening free competition in Colombia. This may include price fixing, bid rigging, geographic sharing of markets and certain non-compete clauses.
- Anti-competitive vertical arrangements: any contract, covenant, meeting of the minds, agreed or consciously parallel practice between two or more businesses, which has the purpose or likely effect of lessening free competition in Colombia. This primarily concerns resale price maintenance, vertical allocation of customers or territories and exclusive-dealing arrangements.
- Abuse of dominance: unilateral conduct by which a firm that possesses a dominant position in the market abuses such position. Prohibited conduct may include tying and bundling, predatory pricing, price discrimination, obstructing or impeding third parties' access to markets or marketing channels, refusals to deal, denying access to essential facilities and certain exclusive dealing arrangements.
- Any other unilateral acts, without regard to whether a firm holds a dominant position, as well as any other conduct tending to limit free competition and to maintain or establish unfair prices.

The Superintendent of Industry and Commerce (the "SIC") may impose, for each violation and to each legal entity that commits any anticompetitive practice, fines of up to 100,000 times minimum legal monthly wages, or up to 150% of the profits derived from the restrictive conduct. SIC may also order corporations to cease engaging in the prohibited conduct.

Additionally, the SIC may impose fines up to 2,000 times minimum legal monthly wages on individuals who assist, facilitate, authorize or condone the commission of the above-noted anti-competitive conduct.

Sale and Ownership of Real Estate

The Colombian Constitution protects private ownership of property by Colombian nationals and foreigners. Ownership of real estate is evidenced by a public deed granted before a notary public and the registry of such deed before the Office of Public Registry. While private parties (including individuals and legal entities) may hold ownership interests in Colombian real property, the Colombian Constitution requires that the state own the subsoil, as well as natural and non-renewable resources.

Non-native Colombian citizens and foreign legal entities are entitled to purchase any real property in Colombia other than: (i) vacant and uncultivated lands located on Colombian shores or border regions; or (ii) real estate located on the island of San Andrés and Providence.

Expropriation is usually conducted by a judicial process and in certain exceptional circumstances, by an administrative process. There are specific expropriation regimes for certain sectors, such as but not limited to, the mining, oil and gas and infrastructure sectors.

There is currently no specific expropriation regime for cannabis-related activities; however, the Land National Agency (ANT) is entitled to expropriate rural land in the following cases: (i) in favour of indigenous, afro-Colombian people and other ethnic people, provided the land they inhabit is insufficient; (ii) in favour of farmers of regions affected by public catastrophes; and (iii) in favour of farmers or other people benefiting from special governmental programs to provide land or areas over which there is an ecological interest of the national government. Every act or transaction affecting rights associated with real property must be registered with the Office of Public Registry. The property's ownership history and any encumbrances or liens will be recorded on a certificate maintained by the Office of Public Registry.

Land Usage

In Colombia, municipal and district authorities can regulate the use of land in their territory through the following instruments: (i) Land Management Schemes (for territorial entities with a population of less than 30,000 inhabitants); (ii) Basic Plans of Territorial Organization (for territorial entities with a population between 30,000 and 100,000 inhabitants); and (iii) Land Management Plans (for territorial entities with a population greater than 100,000 inhabitants).

Through these instruments, the municipal or district authority classifies the land to establish its uses and the restrictions or prohibitions in the development of particular activities in the territory. It can be classified as urban land, urban expansion land, rural land, sub-urban land and protected land. The owner of a project or work must confirm that the activity is in accordance with the corresponding ordering instrument (being the Plan de Ordenamiento Territorial, Plan Basico de Ordenamiento Territorial or Esquema de Ordenamiento Territorial) but does not preclude an individual's obligation to get urban permits for the construction of buildings.

Environmental Regulations

Authorities

The Ministry of the Environment and Sustainable Development is the authority for environmental management, planning, regulation and policymaking. In addition, the National Agency of Environmental Licenses (the "NAEL"), regional autonomous corporations ("RACs") and urban environmental authorities are responsible for granting licenses and permits within their jurisdictions (collectively, the "Environmental Authorities").

Environmental Licenses, Permits and Fees

Environmental licenses. The environmental license is the authorization granted by the Environmental Authorities for any given project, work or activity that may cause damage to renewable natural resources or the environment, or have a significant impact on the landscape. An environmental license must be obtained prior to initiating any project, work or activity. The license must include all permits, authorizations or concessions for the use of any renewable natural resources required for the project. Whenever an environmental license is required, the specific permits must be requested within the same license application.

Environmental permits. Projects involving the use of the following natural resources require a specific permit: forest use, dumping of sewage, hazardous waste management, water concession (surface water and underground water use) and atmospheric emissions.

Environmental Responsibility

Under Colombian law, liability for environmental damage following land ownership creates a presumption of liability in case of (i) breach of environmental laws; (ii) environmental damage; and (iii) breach of environmental license or any other administrative act emanating from the Environmental Authorities. The Environmental Authorities may investigate potential claims, authorize preventative measures or impose sanctions on parties breaching environmental law.

General principles of environmental law are set out in Law 99 of 1993. Article 9 of the National Code of Natural Resources and Protection of the Environment establishes principles governing the use of natural resources, including the fact that use must occur without causing harm to the interests of the community or to third parties.

Parties that cause environmental damage while acting under the authority of a permit are responsible for rectifying the damage. The imposition of environmental sanctions is in addition to civil and criminal penalties that may be imposed. Environmental damage caused while a party is acting without a license constitutes a breach of Law 99 of 1993 and may lead to the imposition of sanctions and possibly civil or criminal

proceedings. Parties that cause environmental damage, in addition to sanctions or penalties that apply, will also be required to carry out studies to assess the characteristics of the damage.

Genetically Modified Organisms

Genetic material of living organisms found in the Colombian territory are the property of the Colombian State. They are inalienable, imprescriptible and not subject to seizure or similar measures. Andean Decision 391 of 1996, signed by the member countries of the Andean Community, regulates access to genetic resources in the form of genes or derived products and establishes that parties require authorization to obtain access.

Under Decree Law 3570 of 2011, the Ministry of the Environment and Sustainable Development is responsible for processing requests for access to genetic resources and signing corresponding access contracts, in accordance with the procedure provided for in Resolution 620 of 1997.

According to Resolution 1352 of 2017, applications for a patent for products or procedures obtained or developed from genetic resources or their derived products must include a copy of the contract of access to genetic resources. The use and transboundary transport of Modified Live Organisms (“OVM”) is regulated by the Convention on Biological Diversity, Law 165 of 1994, the Cartagena Protocol on Bio- safety and Decree 1071 of 2015.

The use and transboundary movement of OVMs requires prior authorization from the following authority in the relevant jurisdiction: (i) Ministry of Agriculture and Rural Development, through the ICA, for OVMs for agricultural, livestock, fishing, commercial and agro-industrial forest plantations; (ii) Ministry of the Environment and Sustainable Development when dealing with OVMs for environmental use; and (iii) Ministry of Health, through INVIMA, for OVMs for human consumption.

Exchange Regulation

Law 9 of 1991 outlines the general framework for the current foreign exchange regime in Colombia, which provides that the Colombian Government is in charge of regulating foreign investment operations in Colombia through the Superintendence of Finance (the “CSF”) and that the Republic Bank of Colombia (“BR”) is in charge of regulating monetary policy and the exchange market.

Colombian exchange regulation provides some restrictions and obligations that should be complied with by residents and non-residents.

The performance of transactions in foreign currencies in Colombia or between individuals or corporations resident in Colombia are generally not allowed, with some particular exceptions. Among the more relevant are transactions between companies dedicated to the exploration and production of oil and gas, payments between residents through foreign accounts registered before the BR and the payment of international transport freights.

The following activities are subject to exchange market requirements: (i) the import and export of goods; (ii) foreign indebtedness; and (iii) foreign investment made in cash and guarantees issued in foreign currency or in transactions between residents and non-residents. These activities must be channeled through exchange market intermediaries such as local banks or through foreign accounts registered before the BR and are subject to certain BR registration requirements.

Accounts receivable resulting from the aforementioned activities must be repaid in cash and cannot be offset against any credit or inventory arrangements.

Sanctions

All foreign investors must register their investments or will risk incurring sanctions. Not registering a foreign investment in a timely and appropriate manner constitutes an exchange offense punishable by a fine of up

to 200% of the amount of the non-registered investment. The amount is reduced to 70% if the offender admits its liability. Other penalties are imposed if foreign exchange regulations are not followed.

Anti-Money Laundering

Colombia has implemented regulations for the control, mitigation and prevention of money laundering from terrorist activities, based on the recommendations made by the Financial Action Task Force and the Basel Committee on Banking Supervision. Colombian Law 526 of 1999 created the Special Administrative Unit for Financial Information and Analysis (“UIAF”), which is responsible for detecting money laundering operations as well as centralizing and analyzing data related to money laundering operations.

Institutions regulated by the “CSF” are required to implement an anti-money laundering and counter-terrorism financing risk management system. CSF-regulated corporations are also required to establish self-regulatory systems to manage money laundering and address terrorism financing risks.

Taxes

Tax regulation is complex and subject to frequent amendments. Recent amendments have implemented base erosion and profit-sharing measures as well as emphasized the enforcement of the value-added tax (“VAT”). Colombia has signed several international treaties following the OECD model to reduce the potential for double taxation. The Colombian tax system is comprised of national, departmental and municipal taxes.

The following is a summary of material Colombian tax regulations impacting Blueberries, which is current as at the date of this Listing Statement and is subject to legislative, judicial or administrative change or interpretation. Any such change or interpretation could result in tax consequences, potentially on a retroactive basis, material to the Issuer’s financial position.

Income Tax on Economic Activities

Colombian companies and individuals deemed residents for taxation purposes are taxed on their worldwide income. Non-resident corporations and individuals are taxed on their Colombian sourced income. Entities engaged in business cooperation agreements, including joint ventures, are taxed as separate taxpayers.

Companies are subject to income tax at a rate of 33% in 2019. Companies with a tax base of COP\$800,000,000 (approximately US\$266,000) or greater are subject to an additional tax surcharge of 4% in 2019.

Colombia’s income tax regime presumes that a corporation’s net income for tax purposes will, at a minimum, equal 3.5% of the corporation’s net equity as calculated at December 31 of the prior year. The corporate tax rate is applied to the presumptive income. Corporations will be subject to the presumptive income whenever the net income of the current taxable year is lower than the presumptive income.

Capital gains are those profits arising from the disposition of assets which have been part of the fixed assets of the taxpayer for a period of at least two calendar years and are taxed at a rate of 10%. Capital losses may only be offset with capital gains over the following 12 taxation years.

Non-Resident Income Tax

For 2019, non-resident corporations will be taxed on their Colombian source income at a rate of 33%. Payments to non-residents are generally subject to withholding tax at a rate of 15% with several exceptions, including payments by way of dividends. The withholding tax rate may be reduced if Colombia is a signatory to a tax treaty with the non-resident’s home jurisdiction. Canada and Colombia have entered into a convention for the avoidance of double taxation. Accordingly, the Company may receive tax rate reductions depending on the scope of the payments that take place between Company and Blueberries SAS.

Under Colombian regulation, foreign companies receiving Colombian-sourced payments, such as interests or dividends may be subject to local tax obligations which in most cases is a withholding income tax. However, these taxes may be greatly reduced or even eliminated by the application of international tax treaties.

In addition to withholding tax, in some circumstances non-residents will be required to file and pay corporate taxes applicable to Colombian resident corporations, at the rates outlined in “Carrying on Business in Colombia – Taxes – Income Tax on Economic Activities”.

Value-Added Tax

The VAT is a 19% indirect national tax applied on: (i) services rendered in Colombia for any individual or corporation, regardless its place of incorporation or tax residency; (ii) services rendered from abroad which are intended to benefit Colombian individuals or companies; (iii) the sale or import of goods; (iv) the first sale of residential units with a price exceeding approximately US\$285,000; and (v) the sale or transfer of intangible assets related to industrial property.

In most cases, VAT does not apply to the sale of fixed assets or export of goods and services. VAT does not apply to expressly excluded goods or services, including most groceries, energy, pharmaceuticals, medical services, certain transportation services, residential tenancies, education services, tickets (i.e. cultural events, sporting events, movies) and certain services related to agricultural activities. Various other products and services are exempt from the application of VAT, including the export of services (provided that certain conditions are complied with) and tourism services.

Generally, VAT paid by a corporation may be treated as an input tax credit if the good or service acquired is related to a VAT-taxable activity and can be characterized as an expense for tax purposes. Accordingly, the VAT payments that are generated by Blueberries SAS are creditable against any VAT paid by Blueberries SAS to third parties. Exporters and producers of exempt goods and services are refunded surplus input VAT.

Tax on Dividends

The tax treatment of dividends distributed to Colombian resident individuals differs depending on whether tax on the dividends was first paid by the corporation. If the dividends were taxed at the corporate level, they are subject to a progressive tax rate ranging from 0% to 10%. If the dividends were not taxed at the corporate level, they are subject to a 35% tax rate. In the last case, the 0-10% dividends tax rate will be applied once the 35% rate has been deducted.

The tax treatment of dividends distributed to Colombian resident corporations similarly varies based on whether tax was first paid by the corporation distributing the dividend. If tax was paid on the dividends by the corporation distributing the dividends, the dividends do not constitute taxable income in the hands of the recipient corporation. If tax was not paid by the distributing corporation, dividends are subject to tax at a rate of 33% (2018). Dividends will be subject to a withholding tax at a rate of 20% which is creditable for income tax purposes.

Dividends distributed to non-residents are taxed at a rate of 5% if tax was first paid on the dividends by the distributing corporation. If the dividends were not taxed at the corporate level, they are subject to a tax rate of 35%. In the last case, the 5% dividends tax rate will be applied once the 35% rate has been subtracted.

Under the tax treaty with Canada, Colombia may tax (i) dividends paid by Blueberries SAS at rate ranging between 5% and 15% on the gross amount of the dividend (5% if the Canadian entity controls at least 10% of the voting power of Blueberries SAS) and interest by Blueberries SAS to its parent at a withholding rate not to exceed 10% of the gross amount of the interest.

Medicinal Cannabis Consumption Tax

Law 1819 of 2016 created a Medicinal Cannabis Consumption Tax (“MCCT”) levied on the sale of any manufactured products that contains psychoactive or non-psychoactive cannabis. The MCCT is assessed

at a rate of 16%. MCCT cannot be used as input tax credits for VAT purposes. In other words, the MCCT cannot be creditable for VAT purposes but can be treated as a deductible expense for income tax purposes. However, it may be treated as deductible expenses. The taxpayer is the buyer or producer of cannabis that submits cannabis to a transformation process. According to Colombian tax law, transformation is understood as (i) any process that implies changing the form of cannabis; (ii) any transmutation of flowering tops or with fruit, in any other product; or (iii) obtaining a derivative through any mechanical, physical, chemical or biological process from psychoactive or non-psychoactive cannabis. These derivatives include, among others, oils, resins, tinctures, extracts or plant materials from cannabis plants.

BUSINESS RISKS

Limited Operating History

Blueberries is an early stage company and has a limited operating history upon which its business and future prospects may be evaluated. Blueberries will be subject to all of the business risks and uncertainties associated with any new business enterprise, including the risk that it will not achieve its operating goals. In order for Blueberries to meet future operating and debt service requirements, Blueberries will need to be successful in its growing, marketing and sales efforts. Additionally, where Blueberries experiences increased sales, Blueberries' current operational infrastructure may require changes to scale the Company's business efficiently and effectively to keep pace with demand and achieve long-term profitability. If Blueberries' products and services are not accepted by new customers, the Company's operating results may be materially and adversely affected.

Managing Growth

In order to manage growth and change in strategy effectively, the Resulting Issuer must (i) maintain adequate systems to meet customer demand; (ii) expand sales and marketing, distribution capabilities and administrative functions; (iii) expand the skills and capabilities of its current management team; and (iv) attract and retain qualified employees. While it intends to focus on managing its costs and expenses over the long term, Blueberries expects to invest to support its growth and may have additional unexpected costs. It may not be able to expand quickly enough to exploit potential market opportunities.

Retention and Acquisition of Skilled Personnel

The loss of any member of the Resulting Issuer's management team, could have a material adverse effect on its business and results of operations. In addition, an inability to hire, or the increased costs of new personnel, including members of executive management, could have a material adverse effect on the Resulting Issuer's business and operating results. At present and for the near future, Blueberries will depend upon a relatively small number of employees to develop, market, sell and support its products. The expansion of marketing and sales of its products will require Blueberries to find, hire and retain additional capable employees who can understand, explain, market and sell its products. There is intense competition for capable personnel in all of these areas and Blueberries may not be successful in attracting, training, integrating, motivating, or retaining new personnel, vendors, or subcontractors for these required functions. New employees often require significant training and, in many cases, take significant time before they achieve full productivity. As a result, the Resulting Issuer may incur significant costs to attract and retain employees, including significant expenditures related to salaries and benefits and compensation expenses related to equity awards, and may lose new employees to its competitors or other companies before it realizes the benefit of its investment in recruiting and training them. In addition, as the Resulting Issuer moves into new jurisdictions, it will need to attract and recruit skilled employees in those areas.

Legal Proceedings

From time to time, Blueberries may be a party to legal and regulatory proceedings, including matters involving governmental agencies, entities with whom it does business and other proceedings arising in the ordinary course of business. Blueberries will evaluate its exposure to these legal and regulatory proceedings and establish reserves for the estimated liabilities in accordance with generally accepted accounting principles. Assessing and predicting the outcome of these matters involves substantial

uncertainties. Unexpected outcomes in these legal proceedings, or changes in management's evaluations or predictions and accompanying changes in established reserves, could have an adverse impact on Blueberries' financial results.

Regulatory Compliance Risks

Achievement of Blueberries' business objectives is contingent, in part, upon compliance with regulatory requirements enacted by governmental authorities and obtaining all regulatory approvals, where necessary, for the sale of its products. Blueberries may not be able to obtain or maintain the necessary licenses, permits, quotas, authorizations or accreditations, or may only be able to do so at great cost, to operate its business. Blueberries cannot predict the time required to secure all appropriate regulatory approvals for its products, or the extent of testing and documentation that may be required by local governmental authorities. The impact of the compliance regime, any delays in obtaining, or failure to obtain or keep the regulatory approvals may significantly delay or impact the development of markets, products and sales initiatives and could have a material adverse effect on the business, results of operations and financial condition of Blueberries.

The officers and directors of Blueberries must rely, to a great extent, on Blueberries' Colombian legal counsel and local consultants retained by Blueberries in order to keep abreast of material legal, regulatory and governmental developments as they pertain to and affect Blueberries' business operations, and to assist Blueberries with its governmental relations. Blueberries must rely, to some extent, on those members of management and the board who have previous experience working and conducting business in Colombia in order to enhance its understanding of and appreciation for the local business culture and practices in Colombia.

Blueberries also relies on the advice of local experts and professionals in connection with current and new regulations that develop in respect of banking, financing and tax matters in Colombia. Any developments or changes in such legal, regulatory or governmental requirements or in local business practices in Colombia are beyond the control of Blueberries and may adversely affect its business.

Blueberries will incur ongoing costs and obligations related to regulatory compliance. Failure to comply with applicable laws, regulations and permitting requirements may result in enforcement actions thereunder, including orders issued by regulatory or judicial authorities causing operations to cease or be curtailed, and may include corrective measures requiring capital expenditures, installation of additional equipment, or remedial actions. Blueberries may be required to compensate those suffering loss or damage by reason of its operations and may have civil or criminal fines or penalties imposed for violations of applicable laws or regulations. In addition, changes in regulations, more vigorous enforcement thereof or other unanticipated events could require extensive changes to Blueberries' operations, increased compliance costs or give rise to material liabilities, which could have a material adverse effect on the business, results of operations and financial condition of Blueberries.

Canadian Regulatory and Civil Proceedings

The sale and distribution of cannabis products for medicinal use by licensed producers is legal in certain Canadian provinces. The Canadian federal government legalized marijuana effective October 17, 2018.

Blueberries operates in Colombia pursuant to the Blueberries Licenses and authorizations granted by the Ministry of Justice and the Ministry of Health. Consequently, certain activities conducted by Blueberries are permissible under one regulatory regime while not under another. In the past, Canadian courts and regulatory authorities have taken the view that it is not contrary to Canadian federal or provincial law for a person to be engaged in, or for an entity to hold interests in affiliates that are engaged in, certain regulated activities where such activities may be regulated differently than in the home jurisdictions and have enforced extra-territorial laws even where such laws (or regulatory regimes applicable to certain activities or industries) differs from those in the Canadian jurisdiction. There is a risk however that the Canadian courts or applicable Canadian or other governmental authorities may take a contrary view with respect to the business of Blueberries and view Blueberries as having violated their local laws, despite Blueberries having obtained all applicable Colombian licenses or authorizations and despite that Blueberries does not carry on business in Canada. Therefore, there is a risk that civil and criminal proceedings, including class actions,

could be initiated against Blueberries. Such potential proceedings could involve substantial litigation expense, penalties, fines, seizure of assets, injunctions or other restrictions being imposed upon Blueberries or its business partners, while diverting the attention of key executives. Such proceedings could have a material adverse effect on Blueberries' business, revenues, operating results and financial condition as well as impact upon Blueberries' reputation.

Change of Cannabis Laws, Regulations and Guidelines

Cannabis laws and regulations are dynamic and subject to evolving interpretations which could require Blueberries to incur substantial costs associated with compliance or alter certain aspects of its business plan. It is also possible that regulations may be enacted in the future that will be directly applicable to certain aspects of Blueberries' businesses. Blueberries cannot predict the nature of any future laws, regulations, interpretations or applications, nor can it determine what effect additional governmental regulations or administrative policies and procedures, when and if promulgated, could have on Blueberries' business. Management expects that the legislative and regulatory environment in the cannabis industry in Colombia and internationally will continue to be dynamic and will require innovative solutions to try to comply with this changing legal landscape in this nascent industry for the foreseeable future. Compliance with any such legislation may have a material adverse effect on Blueberries' business, financial condition and results of operations.

Public opinion can also exert a significant influence over the regulation of the cannabis industry. A negative shift in the public's perception of the cannabis industry could affect future legislation or regulation in different jurisdictions.

Reliance on Blueberries Licenses and Authorizations

Blueberries' ability to grow, store and sell cannabis in Colombia is dependent on Blueberries' ability to sustain and/or obtain the necessary licenses and authorizations by certain authorities in Colombia.

The pending licenses and authorizations are subject to ongoing compliance and reporting requirements and the ability of Blueberries to obtain, sustain or renew any such licenses and authorizations on acceptable terms is subject to changes in regulations and policies and to the discretion of the applicable authorities or other governmental agencies in foreign jurisdictions. Failure to comply with the requirements of the licenses or authorizations or any failure to maintain the licenses or authorizations would have a material adverse impact on the business, financial condition and operating results of Blueberries.

Although Blueberries believes that it will meet the requirements to obtain, sustain or renew the necessary licenses and authorizations, there can be no guarantee that the applicable authorities will issue these licenses or authorizations. Should the authorities fail to issue the necessary licenses or authorizations, Blueberries may be curtailed or prohibited from the production and/or distribution of cannabis or from proceeding with the development of its operations as currently proposed and the business, financial condition and results of the operation of Blueberries may be materially adversely affected.

Reliance on One Facility

The cultivation facility is currently only licensed facility under the Licenses. The Licenses held by Blueberries are specific to the Cultivation Facility. Adverse changes or developments affecting the cultivation facility, including but not limited to a breach of security, could have a material and adverse effect on Blueberries' business, financial condition and prospects. Any breach of the security measures and other facility requirements, including any failure to comply with recommendations or requirements arising from inspections by Colombian regulatory authorities, could have an impact on Blueberries' ability to receive or hold the licenses.

Certain contemplated capital expenditures of Blueberries may require approval of Colombian regulatory authorities. There is no guarantee that Colombian Regulatory Authorities will approve any contemplated expansion and/or renovation, which could adversely affect the business, financial condition and results of Blueberries' operations.

Unexpected disruptions affecting operations, whether due to labor disruptions, supply disruptions, power disruptions, damage to equipment or otherwise

Blueberries' operations may be disrupted by a variety of risks and hazards that are beyond its control, including, but not limited to, fires, power outages, labour disruptions, supply disruptions, flooding, and the inability to obtain suitable or adequate machinery, equipment or labour as well as other risks involved in the cultivation and production of medicinal cannabis.

Demand for Cannabis and Derivative Products

The legal cannabis industry in Colombia is at an early stage of its development. Consumer perceptions regarding legality, morality, consumption, safety, efficacy and quality of medicinal cannabis are mixed and evolving and can be significantly influenced by scientific research or findings, regulatory investigations, litigation, media attention and other publicity regarding the consumption of medicinal cannabis products. There can be no assurance that future scientific research, findings, regulatory proceedings, litigation, media attention or other research findings or publicity will be favourable to the medicinal cannabis market or any particular product, or consistent with earlier publicity. Future research reports, findings, regulatory proceedings, litigation, media attention or other publicity that are perceived as less favourable than, or that question, earlier research reports, findings or publicity could have a material adverse effect on the demand for medicinal cannabis and on the business, results of operations, financial condition and cash flows of Blueberries. Further, adverse publicity reports or other media attention regarding cannabis in general, or associating the consumption of medicinal cannabis with illness or other negative effects or events, could have such a material adverse effect. Public opinion and support for medicinal cannabis use has traditionally been inconsistent and varies from jurisdiction to jurisdiction. While public opinion and support appears to be rising for legalizing medicinal cannabis, it remains a controversial issue subject to differing opinions surrounding the level of legalization. Blueberries' ability to gain and increase market acceptance of its business may require substantial expenditures on investor relations, strategic relationships and marketing initiatives. There can be no assurance that such initiatives will be successful and their failure may have an adverse effect on Blueberries.

Liability, Enforcement, Complaints, etc.

Blueberries' participation in the cannabis industry may lead to litigation, formal or informal complaints, enforcement actions, and inquiries by third parties, other companies and/or various governmental authorities against Blueberries. Litigation, complaints, and enforcement actions involving Blueberries could consume considerable amounts of financial and other corporate resources, which could have an adverse effect on Blueberries' future cash flows, earnings, results of operations and financial condition.

Product Liability

As a distributor of products designed to be ingested by humans, Blueberries faces an inherent risk of exposure to product liability claims, regulatory action and litigation if its products are alleged to have caused damages, loss or injury. In addition, the sale of Blueberries' products involve the risk of injury to consumers due to tampering by unauthorized third parties or product contamination. Adverse reactions resulting from human consumption of Blueberries' products alone or in combination with other medications or substances could occur. Blueberries may be subject to various product liability claims, including, among others, that Blueberries' products caused injury or illness, include inadequate instructions for use or include inadequate warnings concerning health risks, possible side effects or interactions with other substances. A product liability claim or regulatory action against Blueberries could result in increased costs, could adversely affect Blueberries' reputation with its clients and consumers generally, and could have a material adverse effect on the results of operations and financial condition of Blueberries. There can be no assurances that Blueberries will be able to obtain or maintain product liability insurance on acceptable terms or with adequate coverage against potential liabilities. Such insurance is expensive and may not be available in the future on acceptable terms, or at all. The inability to obtain sufficient insurance coverage on reasonable terms or to otherwise protect against potential product liability claims could prevent or inhibit the commercialization of Blueberries' potential products.

Insurance Coverage

Blueberries' production is, in general, subject to different risks and hazards, including adverse weather conditions, fires, plant diseases and pest infestations, other natural phenomena, industrial accidents, labour disputes, changes in the legal and regulatory framework applicable to Blueberries and environmental contingencies.

Blueberries is in the process of obtaining additional insurance coverage over Blueberries' growing production and facilities. Blueberries is seeking insurance against a variety of risks, including losses and damages relating to its plants, equipment and buildings. Any insurance that Blueberries is successful in obtaining may only cover part of the losses it may incur and may not cover losses on crops due to drought or floods. Furthermore, certain types of risks may not be covered by the future policies. There is a risk that any claims to be paid by an insurer due to the occurrence of a casualty covered may not be sufficient to compensate Blueberries for all of the damages suffered. Blueberries may not be able to maintain or obtain insurance of the type and amount desired at a reasonable cost. If Blueberries were to incur significant liability for which it were not fully insured, it could have a materially adverse effect on Blueberries' business, financial condition and results of operations.

Ability to Establish and Maintain Bank Accounts

While Blueberries does not anticipate dealing with banking restrictions, there is a risk that banking institutions in countries where Blueberries operates will not accept payments related to the cannabis industry. Such risks could increase costs for Blueberries. In the event financial service providers do not accept accounts or transactions related to the cannabis industry, it is possible that Blueberries may be required to seek alternative payment solutions, including but not limited to cryptocurrencies such as Bitcoin. There are risks inherent in cryptocurrencies, most notably its volatility and security issues. If the industry was to move towards alternative payment solutions and accept payments in cryptocurrency Blueberries would have to adopt policies and protocols to manage its volatility and exchange rate risk exposures. Blueberries' inability to manage such risks may adversely affect Blueberries' operations and financial performance.

Product Recalls

Manufacturers and distributors of products are sometimes subject to the recall or return of their products for a variety of reasons, including product defects, such as contamination, unintended harmful side effects or interactions with other substances, packaging safety and inadequate or inaccurate labelling disclosure. If any of Blueberries' products are recalled due to an alleged product defect or for any other reason, Blueberries could be required to incur the unexpected expense of the recall and any legal proceedings that might arise in connection with the recall. Blueberries may lose a significant amount of sales and may not be able to replace those sales at an acceptable margin or at all. In addition, a product recall may require significant management attention. Although Blueberries has detailed procedures in place for testing its products, there can be no assurance that any quality, potency or contamination problems will be detected in time to avoid unforeseen product recalls, regulatory action or lawsuits. Additionally, if Blueberries is subject to recall, the image of Blueberries could be harmed. A recall for any of the foregoing reasons could lead to decreased demand for Blueberries' products and could have a material adverse effect on the results of operations and financial condition of Blueberries. Additionally, product recalls may lead to increased scrutiny of Blueberries' operations by regulatory agencies, requiring further management attention, potential loss of applicable licenses and potential legal fees and other expenses.

Risks Inherent in an Agricultural Business

Blueberries' business involves the growing of blueberries with the prospect of growing cannabis in the future. Both of which are agricultural products and grown outdoors. The occurrence of severe adverse weather conditions, especially droughts, hail, floods or frost, is unpredictable and may have a potentially devastating impact on agricultural production, and may otherwise adversely affect the supply of cannabis. Adverse weather conditions may be exacerbated by the effects of climate change and may result in the introduction and increased frequency of pests and diseases. The effects of severe adverse weather conditions may reduce Blueberries' yields or require Blueberries to increase its level of investment to maintain yields. Additionally, higher than average temperatures and rainfall can contribute to an increased

presence of insects and pests, which could negatively affect crops. Future droughts could reduce the yield and quality of Blueberries' production, which could materially and adversely affect Blueberries' business, financial condition and results of operations.

The occurrence and effects of plant disease, insects and pests can be unpredictable and devastating to agricultural, potentially rendering all or a substantial portion of the affected harvests unsuitable for sale. Even when only a portion of the production is damaged, Blueberries' results of operations could be adversely affected because all or a substantial portion of the production costs may have been incurred. Although some plant diseases are treatable, the cost of treatment can be high and such events could adversely affect Blueberries' operating results and financial condition. Furthermore, if Blueberries fails to control a given plant disease and the production is threatened, Blueberries may be unable to supply its customers, which could adversely affect its business, financial condition and results of operations. There can be no assurance that natural elements will not have a material adverse effect on any such production.

Risks Inherent in Rural Real Estate

The Colombian Constitution protects the right to own private property and related rights acquired in compliance with civil regulations. According to Colombian Constitution, legally acquired private property ownership rights cannot be affected if the owner is in compliance with applicable laws.

Except in the case of public necessity or social interest, subject to due process and the payment of an indemnification, expropriations without just cause or on a discriminatory basis are restricted.

In August 2011, Colombia and Canada entered into a Free Trade Agreement (CCOFTA), which outlines the issue of expropriations in Article 811 as well as dispute settlements in Chapter 21. The Free Trade Agreement provides that Canadian investments in Colombia will be granted fair and equitable treatment with full protection and security and will be accorded no less favourable treatment than Colombia grants to its own investors or investors of any other country. It also provides that an investment will not be expropriated except in a nondiscriminatory manner in accordance with due process of law with prompt and adequate compensation. The expropriation provisions cover both traditional "direct" takings and so-called "indirect" or "creeping" expropriation, which results from a measure or a series of measures by a government that have an effect equivalent to direct expropriation without a formal transfer of title or outright seizure of the investment. An investor-state dispute resolution process is provided for in the event that the investment is not provided the protections set out in the CCOFTA. Through this process, a Canadian investor can challenge a Colombian measure through binding international arbitration instead of relying on the Colombian local courts.

Energy Prices and Supply

Blueberries requires substantial amounts of electric energy and other resources for its harvest activities and transport of cannabis. Blueberries relies upon third parties for its supply of energy resources used in its operations. The prices for and availability of energy resources may be subject to change or curtailment, respectively, due to, among other things, new laws or regulations, imposition of new taxes or tariffs, interruptions in production by suppliers, imposition of restrictions on energy supply by government, worldwide price levels and market conditions. If energy supply is cut for an extended period of time and Blueberries is unable to find replacement sources at comparable prices, or at all, Blueberries' business, financial condition and results of operations would be materially and adversely affected.

Supply of Cannabis Seeds

If for any reason the supply of cannabis seeds is ceased or delayed, Blueberries would have to seek alternate suppliers and obtain all necessary authorization for the new seeds. If replacement seeds cannot be obtained at comparable prices, or at all, or if the necessary authorizations are not obtained, Blueberries' business, financial condition and results of operations would be materially and adversely affected.

Changes in Corporate Structure

Colombian cannabis licenses are granted on a non-transferable, non-exchangeable and non-assignable basis. Any breach of this restriction may give rise to unilateral termination of the license by the governmental authority.

Notwithstanding the above, Colombian laws do not provide for specific regulations or restrictions regarding the effects of a change in control, modification of the corporate structure, issuance of shares, or any changes in holders or final beneficiaries of cannabis licenses.

Colombian legislation gives special attention to the identification and background of the legal representatives of licensees. Licensees must file a declaration of the legality of the proceeds of the legal representatives. Furthermore, Decree 613 of 2017 provides a set of resolutive conditions, which enable the Ministry of Health or the Ministry of Justice, as applicable, to terminate a license if the licensee fails to request the amendment of the license within 30 calendar days following any changes in (i) the legal representation of the licensee; or (ii) the declaration that a legal representative is criminally liable for drug trafficking or related crimes, after having issued the respective license.

Emerging Market Risks

Emerging market investment generally poses a greater degree of risk than investment in more mature market economies because the economies in the developing world are more susceptible to destabilization resulting from domestic and international developments.

All of Blueberries' operations are in Colombia. Colombia has a history of economic instability or crises (such as inflation or recession). While there is no current political instability, and historically there has been no change in laws and regulations, this is subject to change in the future and could adversely affect Blueberries' business, financial condition and results of operations.

In particular, fluctuations in the Colombian economy and actions adopted by the Government of Colombia have had and may continue to have a significant impact on companies operating in Colombia, including Blueberries. Specifically, Blueberries may be affected by inflation, foreign currency fluctuations, regulatory policies, business and tax regulations and in general, by the political, social and economic scenarios in Colombia and in other countries that may affect Colombia.

Global economic crises could negatively affect investor confidence in emerging markets or the economies of the principal countries in Latin America, including Colombia. Such events could materially and adversely affect Blueberries' business, financial condition and results of operations.

Global Economy

Financial and securities markets in Colombia are influenced by the economic and market conditions in other countries, including other South American and emerging market countries and other global markets. Although economic conditions in these countries may differ significantly from economic conditions in Colombia, investors' reactions to developments in these other countries, such as the recent developments in the global financial markets, may substantially affect the capital flows into, and the market value of securities of issuers with operations in Colombia.

An economic downturn or volatility could have a material adverse effect on Blueberries' business, financial condition and results of operations. The economy of the Colombia, where Blueberries' operations are located, has experienced significant economic uncertainty and volatility during recent years. A weakening of economic conditions could lead to reductions in demand for Blueberries' products. For example, its revenues can be adversely affected by high unemployment and other economic factors. Further, weakened economic conditions or a recession could reduce the amount of income customers are able to spend on Blueberries' products. In addition, as a result of volatile or uncertain economic conditions, Blueberries may experience the negative effects of increased financial pressures on its clients. For instance, Blueberries' business, financial condition and results of operations could be negatively impacted by increased competitive pricing pressure, which could result in Blueberries incurring increased bad debt expense. If Blueberries is not able to timely and appropriately adapt to changes resulting from a weak economic

environment, its business, results of operations and financial condition may be materially and adversely affected.

A crisis in other emerging market countries could dampen investor enthusiasm for securities of issuers with South American operations. Financial conditions in Argentina, Brazil or other emerging market countries could negatively impact Colombia's economy in the future. If such fluctuations were to occur, Blueberries' business, financial condition and results of operations could be materially and adversely affected.

CSE Restrictions on Business

As a condition to initially listing on the CSE, the CSE required that Blueberries deliver an undertaking (the "Undertaking") confirming that, while listed on CSE, Blueberries will only conduct the business of the production, sale and distribution of medicinal marijuana in Colombia pursuant to the Licenses and in accordance with applicable law, unless prior approval is obtained from CSE. The Undertaking could have an adverse effect on Blueberries' ability to do business or operate outside of Colombia and on its ability to expand its business into other areas, including the provision of non-medical marijuana in the event that the laws were to change to permit such sales, if Blueberries is still listed on the CSE and remains subject to the Undertaking at such time. The Undertaking may prevent Blueberries from expanding into new areas of business when Blueberries' competitors have no such restrictions. All such restrictions could materially and adversely affect the growth, business, financial condition and results of Blueberries' operations.

Risks Related to Investment in a Colombian Company

Operational Risks

Operations in Colombia are subject to risk due to the potential for social, political, economic, legal and fiscal instability. The government in Colombia faces ongoing problems including but not limited to inflation, unemployment and inequitable income distribution. Colombia is also home to South America's largest and longest running insurgency and large swaths of the countryside are under guerrilla influence. In addition, Colombia experiences narcotics-related violence, a prevalence of kidnapping and extortionist activities and civil unrest in certain areas of the country. Such instability may require Blueberries to suspend operations on its properties. Although Blueberries is not presently aware of any circumstances or facts which may cause the following to occur, other risks may involve matters arising out of the evolving laws and policies in Colombia, any future imposition of special taxes or similar charges, as well as foreign exchange fluctuations and currency convertibility and controls, the unenforceability of contractual rights or the taking or nationalization of property without fair compensation, restrictions on the use of expatriates in Blueberries' operations, or other matters. Blueberries also bears the risk that changes can occur in the government of Colombia and a new government may void or change the laws and regulations that Blueberries is relying upon.

Currently there are no restrictions on the repatriation from Colombia of earnings to foreign entities and Colombia has never imposed such restrictions. However, there can be no assurance that restrictions on repatriation of earnings from Colombia will not be imposed in the future. Exchange control regulations require that any proceeds in foreign currency originated on exports of goods from Colombia (including minerals) be repatriated to Colombia. However, purchase of foreign currency is allowed through any Colombian authorized financial entities for purposes of payments to foreign suppliers, repayment of foreign debt, payment of dividends to foreign stockholders and other foreign expenses.

Inflation in Colombia

Colombia has in the past experienced double digit rates of inflation. If Colombia experiences substantial inflation in the future, Blueberries' costs in Colombian peso terms will increase significantly, subject to movements in applicable exchange rates. Inflationary pressures may also curtail Blueberries' ability to access global financial markets in the longer term and its ability to fund planned capital expenditures, and could materially adversely affect Blueberries' business, financial condition and results of operations. The Colombian government's response to inflation or other significant macro- economic pressures may include the introduction of policies or other measures that could increase Blueberries' costs, reduce operating margins and materially adversely affect its business, financial condition and results of operations.

Operations in Spanish

As a result of Blueberries conducting its operations in Colombia, the books and records of Blueberries, including key documents such as material contracts and financial documentation are principally negotiated and entered into in the Spanish language and English translations may not exist or be readily available.

Enforcement of Judgments

Blueberries is incorporated under the laws of Canada, however all of its assets are located outside Canada. Furthermore, many of Blueberries' directors and officers reside outside Canada. As a result, investors may not be able to effect service of process within Canada upon Blueberries' directors or officers or enforce against them in Canadian courts judgments predicated on Canadian securities laws. Likewise, it may also be difficult for an investor to enforce in Canadian courts judgments obtained against these persons in courts located in jurisdictions outside Canada.

As a result of the above, public shareholders may have more difficulty in protecting their interests in the face of actions taken by management, members of the Board or controlling shareholders than they would as public shareholders of a Canadian company.

Financial and Accounting Risks

Access to Capital

In executing its business plan, Blueberries makes, and will continue to make, substantial investments and other expenditures related to acquisitions, research and development and marketing initiatives. Since its incorporation, Blueberries has financed these expenditures through offerings of its equity securities. Blueberries will have further capital requirements and other expenditures as it proceeds to expand its business or take advantage of opportunities for acquisitions or other business opportunities that may be presented to it. Blueberries may incur major unanticipated liabilities or expenses. Blueberries can provide no assurance that it will be able to obtain financing to meet the growth needs of Blueberries.

Foreign Sales

Blueberries' functional currency is denominated in Canadian dollars. Blueberries currently expects that sales will be denominated in Colombian pesos and may, in the future, have sales denominated in the currencies of additional countries in which it establishes sales offices. In addition, Blueberries incurs the majority of its operating expenses in Colombia Pesos. In the future, the proportion of Blueberries' sales that are international may increase. Such sales may be subject to unexpected regulatory requirements and other barriers. Any fluctuation in the exchange rates of foreign currencies may negatively impact the Resulting Issuer's business, financial condition and results of operations. Blueberries has not previously engaged in foreign currency hedging. If the Resulting Issuer decides to hedge its foreign currency exposure, it may not be able to hedge effectively due to lack of experience, unreasonable costs or illiquid markets. In addition, those activities may be limited in the protection they provide the Resulting Issuer from foreign currency fluctuations and can themselves result in losses.

Estimates or Judgments Relating to Critical Accounting Policies

The preparation of financial statements in conformity with International Financial Reporting Standards, or IFRS, requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Blueberries bases its estimates on historical experience and on various other assumptions that it believes to be reasonable under the circumstances, as provided in the notes to the Blueberries Financial Statements, the results of which form the basis for making judgments about the carrying values of assets, liabilities, equity, revenue and expenses that are not readily apparent from other sources. Blueberries' operating results may be adversely affected if the assumptions change or if actual circumstances differ from those in the assumptions, which could cause Blueberries' operating results to fall below the expectations of securities analysts and investors, resulting in a decline in the share price of the Resulting Issuer. Significant assumptions and estimates used in preparing the financial

statements include those related to the credit quality of accounts receivable, income tax credits receivable, share based payments, impairment of non-financial assets, fair value of biological assets, as well as revenue and cost recognition.

Tax Risks

The Resulting Issuer will operate and will be subject to income tax and other forms of taxation (which are not based upon income) in multiple tax jurisdictions. Taxation laws and rates which determine taxation expenses may vary significantly in different jurisdictions, and legislation governing taxation laws and rates is also subject to change. Therefore, the Resulting Issuer's earnings may be impacted by changes in the proportion of earnings taxed in different jurisdictions, changes in taxation rates, changes in estimates of liabilities and changes in the amount of other forms of taxation. The Resulting Issuer may have exposure to greater than anticipated tax liabilities or expenses. The Resulting Issuer will be subject to income taxes and non-income taxes in a variety of jurisdictions and its tax structure is subject to review by both domestic and foreign taxation authorities and the determination of the Resulting Issuer's provision for income taxes and other tax liabilities will require significant judgment.

The Resulting Issuer will be subject to different taxes imposed by the Colombian government and any changes within such tax legal and regulatory framework may have an adverse effect on our financial results. All current tax legislation is a matter of public record and the Resulting Issuer will be unable to predict which additional legislation or amendments may be enacted.

DISCLOSURE OF INTERNAL CONTROLS

Management has established processes to provide sufficient knowledge to support representations that it has exercised reasonable diligence that (i) the financial statements do not contain any untrue statement of material fact or omit to state a material fact required to be stated or that is necessary to make a statement not misleading in light of the circumstances under which it is made, as of the date of and for the periods presented in the financial statements, and (ii) the financial statements fairly present in all material respects the financial condition, results of operations and cash flows of the Company, as of the date of and for the periods presented.

The Company utilizes the Venture Issuer Basic Certificate, which certificate does not include representations related to the establishment and maintenance of disclosure controls and procedures ("DC&P) or internal control over financial reporting ("ICFR"), as defined in NI 52-109. In particular, the certifying officers do not make any representations related to the establishment and maintenance of:

- i) controls and other procedures designed to provide reasonable assurance that information required to be disclosed by the issuer in its annual filings, interim filings or other reports filed or submitted under securities legislation is recorded, processed, summarized and reported within the time periods specified in securities legislation; and
- ii) a process to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with the issuer's GAAP.

Investors should be aware that inherent limitations on the ability of certifying officers of a venture issuer to design and implement on a cost effective basis DC&P and ICFR as defined in NI 52-109 may result in additional risks to the quality, reliability, transparency and timeliness of interim and annual filings and other reports provided under securities legislation.

NON-GAAP MEASURES

Certain financial measures in this document do not have a standardized meaning as prescribed by IFRS and therefore are considered non-GAAP measures. These measures may not be comparable to similar measures presented by other issuers. These measures have been described and presented in order to provide shareholders and potential investors with additional measures for analyzing our ability to generate

funds to finance our operations and information regarding our liquidity. The additional information should not be considered in isolation or as a substitute for measures prepared in accordance with IFRS. The definition and reconciliation of each non-GAAP measure is presented in the Discussion of Operations and Liquidity and Capital Resources sections of this MD&A.

CAUTIONARY NOTE REGARDING FORWARD-LOOKING STATEMENTS

This MD&A contains certain forward-looking information and forward-looking statements, as defined in applicable securities laws (collectively referred to herein as “forward-looking statements”). These statements relate to future events or the Company’s future performance. All statements other than statements of historical fact are forward-looking statements. Often, but not always, forward-looking statements can be identified by the use of words such as “plans”, “expects”, “is expected”, “budget”, “scheduled”, “estimates”, “continues”, “forecasts”, “projects”, “predicts”, “intends”, “anticipates” or “believes”, or variations of, or the negatives of, such words and phrases, or state that certain actions, events or results “may”, “could”, “would”, “should”, “might” or “will” be taken, occur or be achieved. Forward-looking statements involve known and unknown risks, uncertainties and other factors that may cause actual results to differ materially from those anticipated in such forward-looking statements. The forward-looking statements in this MD&A speak only as of the date of this MD&A or as of the date specified in such statement. The following table outlines certain significant forward-looking statements contained in this MD&A and provides the material assumptions used to develop such forward-looking statements and material risk factors that could cause actual results to differ materially from the forward-looking statements.

Forward Looking Statements	Assumptions	Risk Factors
The Company will be able to continue its business activities.	The Company has anticipated all material costs and the operating activities of the Company, and such costs and activities will be consistent with the Company’s current expectations; the Company will be able to obtain equity funding when required.	COVID-19 caused closures and other unforeseen costs to the Company will arise; any particular operation cost increase or decrease from the date of the estimation; and due to COVID-19 capital markets not being favourable for funding resulting in the Company not being able to obtain financing when required or on acceptable terms.
The Company will be able to carry out anticipated business plans.	In the next twelve months, the operating activities of the Company will be consistent with the Company’s current expectations; debt and equity markets, interest rates and other applicable economic conditions are favourable to the Company.	COVID-19 related uncertainty continuing; sufficient funds not being available; increases in costs, the Company may be unable to retain key personnel to develop or enhance its business, take advantage of future opportunity or respond to competitive pressures.
Management’s outlook regarding future trends.	Financing will be available for the Company’s future business, continuing development, and maintenance of operations.	COVID-19 situation and general economic conditions could adversely impact spending by the Company’s clients, put downward pressure on prices which could adversely impact the business, financial condition or results of operations and the Company may be unable to retain personnel.

Inherent in forward-looking statements are risks, uncertainties and other factors beyond the Company’s ability to predict or control. Please also make reference to those risk factors discussed further below. Readers are cautioned that the above chart does not contain an exhaustive list of the factors or assumptions that may affect the forward-looking statements, and that the assumptions underlying such statements may prove to be incorrect. Actual results and developments are likely to differ, and may differ materially, from those expressed or implied by the forward-looking statements contained in this MD&A.

Forward-looking statements involve known and unknown risks, uncertainties and other factors that may cause the Company's actual results, performance, or achievements to be materially different from any of its future results, performance or achievements expressed or implied by forward-looking statements. All forward-looking statements herein are qualified by this cautionary statement. Accordingly, readers should not place undue reliance on forward-looking statements. The Company undertakes no obligation to update publicly or otherwise revise any forward-looking statements whether as a result of new information or future events or otherwise, except as may be required by law. If the Company does update one or more forward looking statements, no inference should be drawn that it will make additional updates with respect to those or other forward-looking statements, unless required by law.
