

Blueberries
Medical Corp.

BLUEBERRIES MEDICAL CORP.

(formerly CDN MSolar Corp.)

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

**FOR THE THREE AND SIX MONTHS ENDED
JUNE 30, 2020**

Dated August 25, 2020

The following Management's Discussion and Analysis (the "MD&A") of Blueberries Medical Corp. ("Blueberries" or the "Company"), formerly CDN MSolar Corp. ("CMS") for the three and six months ended June 30, 2020, as well as information and expectations concerning Blueberries' outlook are based on currently available information.

This MD&A should be read in conjunction with Blueberries' unaudited interim consolidated financial statements for the three and six months ended June 30, 2020, as well as Blueberries' audited annual consolidated financial statements for the year ended December 31, 2019 (collectively, the "Financial Statements"). The Financial Statements and notes thereof are prepared in accordance with International Financial Reporting Standards ("IFRS") and its interpretations adopted by the International Accounting Standards Board ("IASB").

The MD&A, and the annual audited consolidated financial statements have been filed on SEDAR at www.sedar.com. Additional information can also be found on the Company's website at www.blueberriesmed.com.

This MD&A is prepared as of August 25, 2020. All dollar values are expressed in Canadian dollars, unless otherwise indicated.

HIGHLIGHTS

- In June 2020 Blueberries commenced sales of its proprietary cultivars. Blueberries has entered into multiple sales agreements to distribute its proprietary genetics to licensed producers located in Bogota Savannah, the region where the Company operates. Under the agreements, the Company will leverage contract growers to produce the Company's registered non-psychoactive cannabidiol ("CBD") strains. These proprietary cultivars were developed and tested by the Company's agronomic team and optimized for growth in the local climate. Production from contract growers will be processed at the Company's extraction facility under arrangements whereby Blueberries will retain a certain portion of the extracted product for resale as compensation for these services. Such arrangements provide the Company with premium extracts without the associated cultivation capital expenditures and related risks.
- On June 8, 2020 Blueberries' wholly owned subsidiary Blueberries SAS ("BBSAS") entered into a collaboration agreement with Medicamentos de Cannabis SAS ("Medcann"), to develop, and produce Tetrahydrocannabinol ("THC") cannabis extracts for the international market. Blueberries will develop a Research and Development ("R&D") project with Medcann to produce commercial THC dominant extracts. The Company will utilize its extraction capabilities to process the THC dominant cannabis flower cultivated by Medcann.
- In July 2020 Blueberries closed a non-brokered private placement offering (the "Offering") of C\$1,000,000 in principal amount of unsecured convertible debentures (the "Debentures"). The Debentures will mature 24 months from the date of closing (the "Maturity Date") and bear interest at a rate of 13% per annum. The Debentures will be convertible at the option of the investors, in whole or in part, into common shares of the Company (the "Shares") at a conversion price of the lower of: (i) C\$0.065 per Share or; (ii) the volume-weighted average price of the Shares on the Canadian Securities Exchange ("CSE") for the 15 consecutive trading day period ending on the Conversion Date subject to a minimum conversion price of C\$0.05. Prior to the Maturity Date, the Company may prepay all or part of the outstanding principal amount of the Debenture and any accrued and unpaid interest thereon at any time and from time to time, provided that prior to such prepayment, the Company must provide the investors with at least five business days prior notice of such intention to make such prepayment at which time the investors may, but shall not be obligated to, convert any or all of the Debentures in accordance with the terms of the Debentures.
- The Offering included a strategic investment of C\$814,647 by Mr. Facundo Garreton. Consequently, on August 1, 2020, Mr. Garreton was appointed as a director of the Company.
- On July 31, 2020 Blueberries held its Annual General and Special Meeting of Shareholders.

RECENT DEVELOPMENTS - Coronavirus ("COVID-19") Pandemic, Its Impact and Influence

Early 2020, there was a global outbreak of coronavirus disease ("COVID-19"), which has had a significant impact on businesses through the restrictions put in place by the Colombian, Canadian, provincial and municipal governments regarding travel, business operations and isolation/quarantine orders.

Blueberries continues to closely monitor and respond where possible to the ongoing COVID-19 situation. As the global situation continues to change rapidly, ensuring the well-being of our employees remains one of our top priorities. Our

facilities in Colombia remain open and operational with heightened measures in place to protect the health and safety of employees, vendors, partners, and their families. The Company is committed to enhancing these measures and implementing other necessary practices as the situation warrants.

At this time, it is unknown the extent of the impact the COVID-19 outbreak may have on the Company as this will depend on future developments that are highly uncertain and that cannot be predicted with confidence. These uncertainties arise from the inability to predict the ultimate geographic spread of the disease, and the duration of the outbreak, including the duration of travel restrictions, business closures or disruptions, and quarantine/isolation measures that are currently, or may be put, in place by Colombia, Canada and other countries to fight the virus. While the extent of the impact is unknown, we anticipate this outbreak may cause reduced customer demand, supply chain disruptions, staff shortages, and increased government regulations, all of which will negatively impact the Company's business and financial condition.

COVID-19 has increased the Company's risk profile significantly, notably due to the following:

- a potential curtailment or total shut down of operations by government
- potential loss of manpower at its facilities
- potential of a Blueberries employee falling ill and causing a disruption to the operations
- the ability to procure and transport critical supplies and parts to the facilities and
- the ability of the Colombian operations to transport finished products to clients to generate revenues.

If any of these events were triggered, the result could be a complete shutdown of the Colombian operations for an undetermined period.

To minimize this risk, the following actions have been taken: a policy has been instituted supporting employees to work from home where practical; preliminary screenings at facilities, any employees or contractors showing potential signs of COVID-19 will be placed into self-isolation; special arrangements at the facilities have been implemented to maximize social distancing.

The Company is treating the threat of a COVID-19 outbreak very seriously. A care-and-maintenance plan has been prepared and would be executed in the event of an outbreak at one of the facilities.

The Company has entered into a cash preservation mode; all non-critical expenditures have been deferred for the foreseeable future. Should the COVID-19 cause a prolonged interruption of operations, this could impact the Company's ability to secure financing required to progress its strategic initiatives and/or could result in an impairment of asset values.

CORPORATE OVERVIEW AND UPDATE

Blueberries is a fully licensed cannabis producer in Latin America with a focus on cultivating, processing, and supplying medicinal-grade cannabis oil extracts and related products. The common shares of the Company are listed on the Canadian Securities Exchange (the "CSE") under the symbol "CNSX: BBM".

Blueberries' wholly owned subsidiary, Blueberries SAS ("BBSAS") is a licensed producer and distributor of medicinal cannabis and cannabis-derived products in Colombia.

Colombia Operations

Blueberries' nursery and propagation centers are located in the municipality of Guatavita, Cundinamarca region. In Guatavita, Blueberries has upgraded the original facility infrastructure, including irrigation and electrical systems, water reservoirs and propagation facility.

With the Colombian government's resolution of unit of agronomic evaluation issued during in 2019, the Company's 142 strains have been registered with the Colombian Agricultural Institute ("ICA"). The Company received approval from the ICA for the registration of five proprietary CBD strains with the national cultivar registry and to commence commercial production of these strains. Additionally, Blueberries has finalized the field tests of ten proprietary THC dominant strains, expecting the approval of these varieties in September 2020.

Blueberries currently has 1.3 hectares (140,000 ft²) of open-air greenhouses built, of which approximately 75% is operational. The remaining space will commence operating according to the evolution of the COVID-19 pandemic.

Blueberries has increased its cannabis cultivation through contract and associate growers to meet market demand for cannabis extracts. The execution of the contract and associate grower model has allowed Blueberries' cultivation to

expand by 130% to more than 322,000 ft² (3 hectares) with additional potential expansion of the cultivated land to a total of 1 million ft² (9.2 hectares), with the Cogua land being developed through an ultra-low cost outdoor cultivation model. The Company is also actively negotiating with local contract growers to further increase its cultivation capacity.

Cannabis crops are currently growing in over 86,000 ft² of open-air greenhouses and outdoor at the Guatavita and Zipaquira properties. Cultivation, and experimental harvesting are now underway along with additional planting in newly constructed greenhouses. Since the beginning of Q2, 2020 a total of 1,027,219 grams of dried flower has been harvested. Yield performance has been in line with expectations.

Initial extraction line with a design capacity to process up to 70,000 kg/year (effective capacity 52,500 kg/year) of dried flower has been put in service, with the objective of becoming an EU-GMP compliant extraction operation. The extraction facility is in an industrial park, with capacity to scale up its extraction, processing, and manufacturing capabilities up to six extraction lines. At the extraction facility, Blueberries has developed diverse CBD dominant formulations and commenced stability tests to measure the shelf life of the extracts and finished products.

The Company is continuing the implementation of ISO 9001 and expect to be certified in early 2021.

Zipaquira Property

Acquired by the Company in February 2019, the Zipaquira property is a 37-acre (15 hectares) agricultural land in the Bogota Savannah. The Zipaquira property consists of fertile land ideally located approximately 24km from the Company's existing 430,000 ft² (4 hectares) Guatavita production facility and 25km from the Company's state-of-the-art extraction facility. The Zipaquira property has ideal growing conditions to cultivate consistent, high quality dried flower. There is supply of natural spring water and the area's abundant access to natural sunlight is expected to result in electricity costs that are significantly below market. On April 17, 2020, the Ministry of Justice and Law of the Republic of Colombia granted to Blueberries a non-psychoactive cultivation license for the Zipaquira property, making it the Company's second licensed cultivation facility to grow non-psychoactive cannabis in Colombia. The Company is in the last stages of the title transfer of the land, pending carve out of ideal boundaries.

Medicinal Cannabis Products and Education Programs

On February 13, 2019, Blueberries entered into a letter of intent for a joint venture with Harmony and Life SAS, operating as "El Manantial" medical centers. The joint venture will further the development and commercialization of Blueberries' medicinal cannabis products through El Manantial's rapidly growing patient base and collaboration with El Manantial's team of physicians, pharmacists, and technicians with deep expertise in a variety of medical areas. It will also provide a direct distribution channel to an established and rapidly growing patient base by selling exclusively Blueberries' cannabis-derived products.

In early 2020, Blueberries and El Manantial developed a treatment-focused medical education program designed to assist physicians in prescribing cannabis-based treatments to patients. The magistral formulations which are treatments with custom-designed concentrations and properties, will be prescribed to patients by physicians for the treatment of specific medication conditions.

Blueberries has also partnerships with the Van Uden International Center for Alternative Medicine ("Van Uden") and the Juan N. Corpas University Foundation (the "Foundation"), two renowned Colombian organizations in the health and academic fields.

The Company's partnerships with the Van Uden International Center for Alternative Medicine and El Manantial Medical Centers will allow for commercial distribution of Blueberries products and magistral formulations through a growing combined patient network of over 19,000 patients which is expected to grow to over 60,000 patients over the next 36-month period as four new centers are projected to come online.

Since April 2019, Blueberries has been cooperating with the International Research Center on Cannabis and Mental Health ("IRCCMH") and the Juan N. Corpas University for the development of medical education programs for physicians and patients in Latin America and product formulation.

IRCCMH is a leading research and academic organization in the cannabis sector with extensive experience in cannabis research and education, pharmacology, product formulation and the efficacy of cannabis-based treatments. Based in New York and aligned with the Silver School of Social Work at New York University, IRCCMH is comprised of renowned scientists, educators and clinicians and was created to bridge a gap between research and clinical practice. IRCCMH also creates education programs for physicians and patients and acts as advisor to several state-sponsored medical cannabis programs and has guided state regulators to create and implement cannabis programs in Pennsylvania, Delaware, New Jersey, Utah, California and other states.

Cosmetics

Blueberries' five approved CBD cosmetics products include face cream, lip balm, body cream, beauty balm, and cannabis oil shampoo. Formulation, branding, and packaging for Blueberries' CBD cosmetic products has been finalized and the pilot lot of products have been manufactured at a laboratory. In early October 2019, Blueberries CBD cosmetics were introduced to participants at a sector conference in Bogota. In July 2020, Blueberries signed an agreement with Netshop Fulfillment SAS ("Netshop"). The agreement transfers the management of the CBD cosmetics business to Netshop, allowing Blueberries to focus more on its core business, keeping a royalty and an exclusivity agreement to provide CBD oil for the manufacturing of the cosmetics.

Non-alcoholic Cannabis-based Beverage

In February, 2019, Blueberries entered into a letter of intent for a joint venture with India Colorada SAS, one of the leading Colombian artisanal brewers and producer of the oldest craft beer in Colombia, Cerveza Colón, to research, develop and commercialize non-alcoholic cannabis-based beverages. This project has been put on hold as the regulation for cannabis beverages in Colombia is not active yet.

The planned joint venture with India Colorada SAS is expected to undertake the research, development, and commercialization of non-alcoholic cannabis-based beverages with the goal of being first to market in Latin America. Pursuant to the joint venture, both companies will apply their respective expertise toward the research and development of beverages containing THC, as well as CBD. The joint venture is expected to commercialize newly developed cannabis-based beverages through India Colorada's established and growing distribution channels in addition to Blueberries' distribution channels. The joint venture will make decisions regarding commercialization of the products in different countries where permitted by regulation on an individual market basis. Pursuant to the terms of the letter of intent, the parties intend to complete the development of new products and commercialization plan over the next 12 months. For the deal to proceed, Blueberries would have to provide the joint venture with up to \$300,000 USD for the research and development phase. Upon completion the R&D process (12 months after the execution), depending on the results of the investigation, the Company would sign the definitive agreement.

The project will commence according to the evolution of the regulation for producing and commercializing beverages with CBD in Colombia.

Argentina Project

On March 25, 2019, the Company entered into a binding letter of intent agreement to purchase 75% of BBV Labs' shares to acquire cannabis cultivation, processing, manufacturing, export and other rights in Argentina, and in return issue 16,000,000 Blueberries common shares to owners of BBV Labs. In accordance with the terms of the LOI, Blueberries made an advance of \$300,000 USD to the Argentinian state-owned company Cannabis Avatara, S.E. ("Cannava") on behalf of BBV Labs as contribution to the joint venture. Pursuant to a definitive agreement, BBV Labs has entered into a joint venture with Cannava to develop and cultivate cannabis on a 3.2 million ft² (74 acres or 30 hectares) prime agricultural property. Cannava will contribute the land to the joint venture as well as all required permits and authorizations necessary to import seeds, cultivate, grow and harvest cannabis, process cannabis and extract cannabis oil and other derivative products for scientific, medicinal and therapeutic purposes and to export cannabis and derivative products and import and export related equipment and products.

The first phase of the Joint Venture project will be a Pilot Cultivation Program (the "Pilot Project") with an estimated capital requirement of \$750,00 to \$1,000,000 and consists of the preparation and cultivation of cannabis on a 50,000 ft² (0.46 hectare) area on public lands provided by Cannava with the goal of producing 4 million grams (4,000 kg) of dry cannabis flower. The Pilot Project will also evaluate and characterize cannabis seeds and strains that are ideal for the climate conditions of Jujuy, and document the proposed operating procedures, technical processes, strains and products that the Joint Venture is seeking to produce. The Company is currently evaluating the timing of the Pilot Project.

Highlights Include:

- The rights to cannabis licenses in Argentina acquired by Blueberries are amongst very few such agreements currently in place to supply cannabis products to the Argentinian population exceeding 44 million people. The acquisition also expands the Company's production footprint internationally and may provide additional export opportunities to other countries with evolving cannabis regulations.
- Blueberries to build a large-scale modern cultivation facility and processing center of excellence in Argentina.

- Cannava will contribute all licenses/permits and authorizations necessary to import seeds, cultivate, grow and harvest cannabis, process cannabis, extract cannabis oil and other derivative products, export cannabis and derivative products, and import/export equipment and products.
- Cannava will grant access to utilize 3.2 million ft² (74 acres or 30 hectares) of prime agricultural land for the cultivation and growth of cannabis in Jujuy Province, Argentina, ideally situated in an area with robust modern infrastructure including fresh water, modern power supply and a nearby airport, with additional land available for potential future expansion.
- Cannava will contribute all cooperation agreements with the National Institute of Agricultural Technology (INTA), Ministry of Security, Ministry of Public Health, National Council of Scientific and Technological Investigations (CONICET) and other regulatory and technological Argentinian authorities as required.

On April 4, 2019, the Company announced that that it has commenced the Phase 1 planning process with Cannava in connection with the cooperation agreement entered into under the scope of the “Provincial Program of Promotion of the Cultivation and Production of Cannabis with Scientific, Medicinal and Therapeutic Purposes of the Province of Jujuy in Argentina” (the “Joint Venture”), through its agreement with BBV Labs.

On July 2, 2019, Blueberries entered into a definitive share purchase agreement with BBV Labs, subject to certain closing conditions. The agreement allows Blueberries to acquire cannabis cultivation, processing, manufacturing, and other rights in Argentina through a joint venture agreement between BBV Labs and Cannava.

On November 29, 2019 Blueberries and BBV Labs entered into an amending agreement, whereby the closing of the definitive share purchase agreement has been postponed to November 30, 2020. In case either party decides not to proceed with the closing by November 30, 2020, the parties agreed that the indemnification payable shall be liquidated damages in an amount equivalent to: (i) the average trading value of the shares of Blueberries during the three (3) calendar months preceding such date, (b) multiplied by 16,000,000, (c) plus twenty five percent. Any delay in closing or payment of the liquidated damages after November 30, 2020 will generate interest at a rate of 5% per year.

The management is currently evaluating the timing of the commencement of the Pilot Project.

Production Licenses

The legalization of the cultivation of cannabis as medicinal Cannabis was based on Law 1787 of 2016 enacted by Colombian Congress, Decree 613 of 2017 the (“Decree”) and regulatory resolutions (577, 578 and 579 of August 8, 2017 enacted by the Ministry of Justice and resolutions 2891 and 2892 of 2017 enacted by the Ministry of Health) which formed a legal framework that regulates the actions of any company in Colombia working with cannabis for medical and scientific purposes, including the cultivation, production, and domestic and international distribution of cannabis, cannabis seeds, High THC Medicinal Cannabis, and Low THC Medicinal Cannabis extracts.

Decree 613 of 2017 specifically outlines the different types of cannabis licenses and general requirements for issuing these licenses. The new requirements from this Decree to obtain a license include providing certification of land use, shareholder structure information, a farming crop plan and manufacturing projected for five years, and registry of plant cultivars with the ICA. The Decree also outlines that the license holder must inform the Ministry of Justice and the National Narcotics Fund of non-psychoactive seeds that become psychoactive either during agricultural evaluation or seed cultivation. Additionally, the Decree outlines new events for termination of licenses including not obtaining at least one quota for each year of licenses and beginning cultivation or commercialization without the ICA registry of plant cultivars.

The Company obtained licenses to grow, cultivate, distribute locally and internationally medical cannabis with high concentrations of Tetrahydrocannabinol “THC” (>1% THC) and medical cannabis with low concentrations of THC (<0.1% THC). Below is a summary of the licenses, their function, status and application.

Licenses	Function	Grant Date	Application
Non-psychoactive cannabis cultivation	· Seed production for planting	Mar. 15, 2018	· Less than 1.0% THC Production of low THC extracts · Domestic and international distribution
	· Grain production		
	· Manufacture of derivatives		
	· Scientific purposes	Apr. 17, 2020	· Scientific research and extension to Zipaquirá
Psychoactive cannabis cultivation	· Seed production for planting	Oct. 24, 2018	· Production of more than 1.0% THC and high THC extracts. · Domestic and international distribution
	· Grain production		
	· Manufacture of derivatives		
	· Scientific purposes	Dec. 5, 2019	· Scientific research
Seeds	· Marketing or delivery	Dec. 3, 2019	· Marketing: Buying and selling of seeds
	· Scientific purposes		
Manufacture of cannabis derivatives	· National use	Aug. 17, 2018	· Manufacture, Produce, Commercialize and export psychoactive and non-psychoactive cannabis derivatives
	· Exportation		
	· Scientific Research	Jan. 29, 2020	· Scientific research and extension to extraction

Changes in Colombian Cannabis Regulations

It is expected that in the near future the Ministry of Health and Social Protection of Colombia is going to publish a modification to Decree 613 of 2017, which is the regulation that guarantees access to cannabis for medical and scientific use. The main changes proposed are related to: actions to improve monitoring and control of cannabis according to international agreements, licensing and quota requirements, especially in fabrication of non-psychoactive derivatives, new regulations on international trade such as enabling use of duty free zones for production of cannabis derivatives, and finally including actions to strengthening small and medium national growers and marketers of medicinal cannabis.

In order to guarantee the juridical safety, the new Decree will have no retroactive effect, grandfathering existing and previous license holders and applications to be processed under current regulations.

DISCUSSION OF OPERATIONS

Selected Financial Information

The following table summarizes results of operations of the Company for the three and six months ended June 30, 2020 and 2019.

<i>(Expressed in Canadian Dollars)</i>	Three months ended June 30,		Six months ended June 30,	
	2020	2019	2020	2019
Revenues	4,644	-	4,644	-
Cost of sales	(3,356)	-	(3,356)	-
Gross profit	1,288	-	1,288	-
Expenses

Comprehensive loss	(811,179)	(1,818,006)	(2,654,776)	(7,446,004)
Loss per share - basic and diluted	(0.007)	(0.015)	(0.020)	(0.071)

	As at June 30, 2020	As at December 31, 2019
Total assets	7,823,250	9,786,447
Total liabilities	1,720,136	1,711,035
Total equity	6,103,114	8,075,412

Revenues

Blueberries commenced commercial operations in late Q2, 2020 with sales of cloned cuttings of its cultivars to associate growers (\$2,239) and introductory sales of its cosmetics products (\$2,405). The Company did not have revenues during first quarter of 2020 or the three and six months ended June 30, 2019.

Cost of sales

Cost of sales for the cloned cuttings include direct expenses relating to agricultural operations for propagation including strain management, cost allocated from mother plants, irrigation, nutrients, consumables such as supplements, trays, peat, personnel costs, electricity and allocation of operational fixed costs. Cost of sales for cosmetics include the third-party all-in contract production costs plus the isolate CBD and allocation of operational fixed costs.

Since the Company is in early stages of commercial operations, a detailed breakdown and discussion of material costs have been presented below under pre-operating expenses.

Pre-operating expenses

Pre-operating expenses are non-capital expenditures relating to Blueberries' cannabis farming and cultivation operations. During the three and six months ended June 30, 2020, \$154,991 and \$406,637 of pre-operating expenses were incurred respectively (2019 - \$245,935 and \$354,457 respectively). The expenditures have been broken down by the specific nature of the costs as seen below:

	Three months ended June 30,		Six months ended June 30,	
	2020	2019	2020	2019
Salary, wages, benefits	74,527	173,636	210,653	262,130
Supplies, spare parts and equipment	31,170	22,440	55,462	34,820
License costs	1,319	12,843	2,507	14,718
Facilities	10,754	21,750	33,393	22,030
Laboratory	6,238	5,770	9,623	9,652
Consultants	2,839	-	20,543	-
Fuel and oil	2,505	6,934	15,759	7,369
Transportation	6,177	-	12,640	-
Utilities	13,102	1,160	32,114	1,809
Other	6,360	1,402	13,943	1,929
Total pre-operating expenses	154,991	245,935	406,637	354,457

Salary, wages, and benefits included within pre-operating expenses relate to employee costs associated with operations staff as oppose to corporate or administrative support staff. During the three months ended June 30, 2020, due to COVID-19, the company implemented voluntary salary reductions for personnel in management positions, which is reflected in the lower salary, wages and benefits expenditures in the period.

General and Administrative (“G&A”) Expenses

Total G&A expenses of \$513,086 and \$1,596,385 were incurred for the three and six months ended June 30, 2020 respectively (2019 - \$1,395,052 and \$2,652,650 respectively). The nature of G&A expenses is as follows:

	Three months ended June 30,		Six months ended June 30,	
	2020	2019	2020	2019
Share based compensation	179,534	366,840	682,478	880,264
Marketing and investor relations	15,674	340,771	51,172	608,683
Director and management fees	108,188	154,219	248,343	227,568
Legal	2,999	124,373	46,584	219,255
Consulting	36,552	122,048	143,615	179,634
Salary, wages, and benefits	83,627	75,070	234,410	144,578
Audit and accounting	19,250	55,335	41,638	113,335
General office	19,600	61,250	66,697	108,996
Travel	187	36,396	10,275	74,427
Filing and transfer agent fees	26,164	29,354	39,966	57,736
Insurance	21,941	9,956	25,995	17,024
Other	(630)	19,440	5,212	21,150
Total general and administrative expenses	513,086	1,395,052	1,596,385	2,652,650

Share based compensation

The Company’s stock option plan provides for the issue of stock options to directors, officers, employees, contractors and consultants, who are all considered related parties to the Company. The plan provides that stock options may be granted up to a number equal to 10% of the Company’s outstanding shares. The plan also indicates that the maximum number of shares which may be issued to any one insider and his or her associates under the plan, together with any other previously established or proposed share compensation arrangements, within a one-year period shall be 5% of the shares outstanding at the time of the grant. Vesting and other terms and conditions are determined by the Board of Directors at the time they are granted.

Non-cash share-based compensation expense was \$179,534 and \$682,478 for the three and six months ended June 30, 2020 respectively (2019 - \$366,840 and \$880,264 respectively). The entire amount has been expensed in the income statement of the Company.

Marketing and investor relations

During the three and six months ended June 30, 2020, the Company incurred \$15,674 and \$51,172 respectively (2019 - \$340,771 and \$608,683) in marketing and investor relations expenses. The H1, 2019 costs were incurred initially relating to promotion of Blueberries stock and communication with investors as part of investor relations. These costs were considered necessary to begin trading on the CSE in order to help promote the Company, raise capital, and

included other business initiatives towards promotion, development, and growth of the Company's operations and assets outside the normal course of the Company's day-to-day endeavors.

Director and management fees

During the three and six months ended June 30, 2020, the Company incurred \$108,188 and \$248,343 in director and management fees. During the same periods last year, these costs were \$154,219 and \$227,568, respectively. These are costs incurred specifically for certain directors and officers of the Company for services provided to Blueberries either from themselves personally or through a related entity. The decrease of \$46,031 from Q2, 2019 to Q2, 2020 reflects deferment of director and management fees due to COVID-19. The director and management fees for the six months ending 2020 are slightly higher than the same period last year due to COVID-19 related savings in Q2, 2020 being offset by commencement of additional board fees and internalizing costs with the appointment of a full-time officer in Q2, 2019.

Legal fees

The Company incurred \$2,999 and \$46,584 in legal services during the three and six months ended June 30, 2020 (2019 - \$124,373 and \$219,255). The fees incurred in 2019 mainly relate to the reverse takeover transaction and consecutive public listing of the company. The 2020 legal fees reflect procurement of legal services for private placements, ongoing administrative matters and legal counsel regarding the structure and format of potential business ventures the Company is pursuing.

Consulting

Blueberries enters into consulting agreements for advice and assistance on operations, quality management, facility development, financial and technical counsel, human resources services, and regulatory compliance. Consulting agreements are typically no longer than one year and are entered into for the purposes of increasing efficiency and productivity of the Company's operations. During the three and six months ended June 30, 2020, total consulting fees of \$36,552 and \$143,615 were incurred respectively (2019 - \$122,048 and \$179,634). The reduction of consulting fees from Q2, 2019 to Q2, 2020 are due to the Company having incurred in H1, 2019 start-up related consulting fees, mainly engagement of new services by the company at the start of the operations on compliance with EU-GMP standards. The company did not incur EU-GMP related consulting fees Q1, 2020. The Q2, 2020 consulting fees are also lower because of savings realized by financial services being internalized commencing in the second half of 2019.

Salary, wages, and benefits

Salary, wages, and benefits include payroll, training, benefits, and severance costs of employees in Colombia. For the three and six months ended June 30, 2020, total salary, wages, and benefits were \$83,627 and \$234,410 respectively (2019 - \$75,070 and \$144,578). The increase from H1, 2019 to H1, 2020 reflects year-on-year increase in number of employees, as in H1, 2019, the Company had just started its operations with limited personnel in place. This increase was partially offset by the Company's reduced head count and salaries due to COVID-19 related measures in effect in the current quarter. The Company made an active choice to reduce its costs, including head count and focus its resources on commercial and revenue-generating activities.

Audit and accounting fees

Audit and accounting fees include cost of audit, accounting and taxation services provided by the Company's external auditor and other third parties. The decrease in fees in 2020 reflect internalization of the accounting function with savings of a monthly \$10,000 fee from a third-party contractor for accounting services provided.

General office expenditures

General office expenditures were \$19,600 and \$66,697 for the three and six months ended June 30, 2020 respectively (2019 - \$61,250 and \$108,996). General office expenses include office and equipment rent, utilities, communication, and cleaning services, which are expensed as incurred. The year-on-year decrease reflects savings measures implemented due to COVID-19 pandemic.

Depreciation and Amortization

Depreciation and amortization of Property, Plant, and Equipment ("PP&E") and intangible assets are dependent upon estimated useful life of an asset, which is the period over which an asset is expected to be available for use. PP&E is depreciated through profit and loss over an asset's estimated useful life. Agricultural facilities and equipment are estimated to have useful lives between 3 – 5 years, while buildings are estimated to have useful lives of 10 years. Assets under construction are not subject to depreciation until they are available for use. Indefinite life licenses are not amortized but are tested for impairment annually, whereas finite useful life licenses are amortized through the income statement.

Right-of-use assets are also depreciated on a straight-line basis over the lesser of the asset useful life and the lease term. As at June 30, 2020, the Company had four right-of-use assets two of which were relating to rural property leased and depreciated over a 6-year lease term. The remaining two were leases of the extraction facility and a vehicle, with terms of five and three years, respectively.

During the three and six months ended June 30, 2020, the Company incurred total depreciation and amortization expenses of \$166,144 and \$342,036 respectively (2019 - \$17,087 and \$30,723). The increase in H1, 2020 versus H1, 2019 reflects ramping up of operations with capital investments carried out throughout 2019 and Q1, 2020, resulting in higher depreciation and amortization expenses.

Listing Expense

The listing expense incurred by the Company was a one-time, non-cash expense of \$4,004,312. As detailed in the Financial Statements, the purchase price paid for the acquisition of CMS was the fair value of the 7,392,772 outstanding CMS shares valued at \$0.48 per share for a total of \$3,548,531. The fair value of the shares was allocated to the fair value of the net liabilities acquired of \$444,182 with the difference being recognized as a non-cash listing expense on the completion of the Transaction. Legal and other professional fees relating to the reverse takeover of \$11,599 were also included as part of the total listing expense.

Foreign Exchange

The Company incurred a foreign exchange gain of \$45,382 and loss of \$90,088 for the three and six months ended June 30, 2020 respectively while the Company incurred foreign exchange losses of \$13,006 and \$23,091 for the three and six months ended June 30, 2019 respectively. The foreign exchange gains and losses are due to fluctuating foreign currency rates causing additional inflow or outflow of working capital required to pay foreign currency transactions. The Company also incurred a currency translation adjustment of \$2,905 gain and \$171,338 loss for the three and six months ended June 30, 2020 (2019 – losses of \$168,028 and \$404,862) due to the Colombian subsidiaries' assets and liabilities being translated at the reporting period exchange rate, while revenues, expenses and cash flows are translated at the average exchange rate for the three and six months ended June 30, 2020.

SELECTED QUARTERLY FINANCIAL INFORMATION

The table below presents the quarterly financial highlights since the Company's incorporation on September 5, 2018.

	Revenues	Net loss	Net loss per share
2020			
Q2	4,644	(814,084)	(0.007)
Q1	-	(1,669,354)	(0.013)
2019			
Q4	-	(1,552,761)	(0.005)
Q3	-	(2,193,973)	(0.019)
Q2	-	(1,649,978)	(0.015)
Q1	-	(5,391,164)	(0.060)
2018			
Q4	-	(463,422)	(0.0100)
Q3	-	(72,231)	(72,231.0000)

The Company's Q3, 2018 net loss per share was equal to the total net loss as during Q3, 2018, the Company had only one share outstanding.

LIQUIDITY AND CAPITAL RESOURCES

The principal activities of the Company are cultivating, producing, and distributing psychoactive and non-psychoactive cannabis by-products in Colombia. These activities are financed through the completion of equity transactions such as equity offerings. There is no assurance that future equity capital will be available to the Company in the amounts or at the times desired by the Company or on terms that are acceptable to it, if at all. See discussion of common risk factors below.

The Company has negative cash flow from operations and therefore must utilize its current cash reserves, to maintain its capacity to meet ongoing operating activities. The negative cash flows from operations was driven by the fact that the Cannabis business is in the development phase with minimal revenue to positively affect cash flows. Net cash used in operating activities were \$559,383 and \$1,314,778 for the three and six months ended June 30, 2020 respectively (2019 - \$1,141,466 and \$2,242,050) and were mainly attributed to paying off outstanding liabilities recorded in accounts payable and ongoing operating, public company, consulting and investor relations activities, which have been expensed in the income statement of the Company. As at June 30, 2020, trade accounts payable and accrued liabilities had a balance of \$962,808 (December 31, 2019 – \$793,399). This balance was classified as a current liability as all amounts are due within 12 months time. As of June 30, 2020, the Company's working capital was negative \$79,138 (December 31, 2019 - \$1,778,494).

Net cash used in investing activities were \$194,563 and \$402,262 respectively for the three and six months ended June 30, 2020 (2019 - \$1,044,757 and \$4,436,400). The 2019 figure is mainly attributable to the purchase of 15 additional hectares of farmland in Cogua for \$1,994,250 and purchase of additional property, plant and extraction equipment. Also, during Q1, 2019, the Company made a \$902,128 short-term investment.

Net cash used in financing activities for the three and six months ended June 30, 2020 totaled \$50,553 and \$104,003 mainly consisting of principal portion of lease payments. The H1, 2019 figure is mainly attributed to proceeds from subscription receipts which converted into shares and warrants as at the date of the RTO Transaction. During the three months ended March 31, 2019, \$4,920,815 was received from the issuance of shares, net of costs and \$3,262,660 from warrants, net of costs. Additionally, 1,464,000 warrants were exercised, bringing in a total of \$585,600 proceeds. The increase in proceeds from financing activities was partially offset by payments made on related party notes of \$251,815.

In July 2020 Blueberries closed a non-brokered private placement offering of C\$1,000,000 in principal amount of unsecured convertible debentures.

The Company's liquidity risk from financial instruments is minimal as excess cash is held in bank accounts with reputable financial institutions.

While the Company has no amount of cash flow from operations, management believes there is sufficient cash resources to meet its administrative overhead costs. The Company will require additional funding to complete its extraction facility post-harvest build-out through development and into production and for working capital as it starts generating revenue. The Company will continue to pursue opportunities to raise additional capital through debt and equity markets to fund its future growth and operating activities. Although the Company has been successful in raising funds to date, there can be no assurance that adequate funding will be available in the future, or under terms favourable to the Company. Should the COVID-19 cause a prolonged interruption of global markets, this could impact the Company's ability to secure financing required to progress in building out the extraction facility and/or could result in an impairment of asset values.

MANAGEMENT OF CAPITAL

The Company's objectives when managing capital are to ensure the Company will have sufficient financial capacity, liquidity, and flexibility to fund the Company's operations, growth, and ongoing developmental activities. The Company is dependent upon funding these activities through a combination of available cash, debt and equity, which it considers to be the components of its capital structure as outlined below.

	June 30, 2020	December 31, 2019
Shareholders' equity	6,103,114	8,075,412
Cash	778,662	2,666,191
Working capital, excluding cash	(857,800)	(887,697)

OFF-BALANCE-SHEET ARRANGEMENTS

As of the date of this MD&A, the Company does not have any off-balance-sheet arrangements that have, or are reasonably likely to have, a current or future effect on the financial performance or financial condition of the Company, including, and without limitation, such considerations as liquidity and capital resources.

OUTSTANDING SHARE DATA

As at the date of this MD&A, the outstanding common shares, stock options, and warrants are as follows:

Common shares outstanding	123,701,831
Stock options	12,035,000
Purchaser warrants	30,666,059
Finder warrants	3,454,103
Fully diluted shares outstanding	169,856,993

FINANCIAL RISK MANAGEMENT

The Company has exposure to the following risks from its use of financial instruments:

Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they become due. The Company's approach to managing liquidity is to ensure, as far as possible, that it will have sufficient cash resources in order to finance operations, fund capital expenditures, and to repay debt and other liabilities of the Company as they come due, without incurring unacceptable losses or risking harm to the Company's reputation.

As at March 31, 2020, the Company's financial liabilities consist of trade accounts payable and accrued liabilities, employee benefits and lease liability, which have contractual payment obligations within one year. The Company manages its liquidity risk by reviewing its capital requirements on an ongoing basis. Based on the Company's working capital position at March 31, 2020, management regards liquidity risk to be low.

Credit risk

Credit risk is the risk of loss associated with the counterparty's inability to fulfil its contractual obligations. Financial instruments subject to credit risk include cash and cash equivalents, and other receivables. All of the Company's cash and short-term investments are held at reputable financial institutions. Other receivables consist mainly of harmonized sales tax and general sales tax receivables that the Company expects to receive from the Government of Canada. As such credit risk is deemed to be low.

Market risk

Market risk is the risk or uncertainty that changes in price, foreign exchange rates, and interest rates will affect the Company's net earnings and the value of financial instruments. Blueberries is exposed to two types of market risk, being foreign currency risk and interest rate risk as outlined below.

Foreign currency risk

Foreign currency risk is the risk that the fair value of future cash flows will fluctuate as a result of changes in foreign currency exchange rates. The Company's functional and reporting currency is the Canadian dollar. However, some of the Company's business transactions and commitments occur in currencies other than Canadian dollars. The Colombian subsidiaries incur expenditures in Colombian pesos, which is their functional currency. Therefore, the Company is exposed to the risk of fluctuations in foreign exchange rates between Colombian pesos and Canadian dollars. Blueberries does not anticipate a significant impact on its condensed interim consolidated financial statements as a result of a 5% change in the exchange rate between the two currencies.

Interest rate risk

Interest rate risk is the risk that future cash flows will fluctuate as a result of changes in prevailing market interest rates. The Company is exposed to interest rate risk on cash and cash equivalents and short-term investments. The Company is also exposed to interest rate risk on promissory notes that may be issued from related or un-related parties. As at March 31, 2020, all promissory notes and related party debt was paid in full, as such, fluctuations of interest rates would not have had a significant impact on the condensed interim consolidated financial statements.

Capital risk management

The Company's objectives when managing capital are to ensure the Company will have sufficient financial capacity, liquidity, and flexibility to fund the Company's operations, growth, and ongoing developmental activities. The Company

is dependent upon funding these activities through a combination of available cash, debt and equity, which it considers to be the components of its capital structure as outlined below.

RELATED PARTY TRANSACTIONS

The Company lists its related party transactions in Note 18 of its unaudited consolidated interim financial statements for the three and six months ended June 30, 2020.

BUSINESS RISKS

COVID-19

During the quarter ended March 31, 2020, the World Health Organization declared the outbreak of the novel strain of coronavirus, specifically identified as "COVID-19", a pandemic resulting in worldwide emergency measures to combat the spread of the virus. These measures, which include self-quarantine period, have caused disruption to businesses globally, which are resulting in an economic slowdown and uncertainties potentially affecting the Company's cash flows, financial condition and results of operations. It is not possible to reliably estimate the length or effect of these developments due to uncertainties including the ultimate geographic spread of the virus, the severity of the disease, the duration of the outbreak, and actions that may be taken by governmental authorities and central banks to contain COVID-19 or to treat its impact.

Limited Operating History

Blueberries is an early stage company and has a limited operating history upon which its business and future prospects may be evaluated. Blueberries will be subject to all of the business risks and uncertainties associated with any new business enterprise, including the risk that it will not achieve its operating goals. In order for Blueberries to meet future operating and debt service requirements, Blueberries will need to be successful in its growing, marketing and sales efforts. Additionally, where Blueberries experiences increased sales, Blueberries' current operational infrastructure may require changes to scale the Company's business efficiently and effectively to keep pace with demand and achieve long-term profitability. If Blueberries' products and services are not accepted by new customers, the Company's operating results may be materially and adversely affected.

Managing Growth

In order to manage growth and change in strategy effectively, the Resulting Issuer must (i) maintain adequate systems to meet customer demand; (ii) expand sales and marketing, distribution capabilities and administrative functions; (iii) expand the skills and capabilities of its current management team; and (iv) attract and retain qualified employees. While it intends to focus on managing its costs and expenses over the long term, Blueberries expects to invest to support its growth and may have additional unexpected costs. It may not be able to expand quickly enough to exploit potential market opportunities.

Retention and Acquisition of Skilled Personnel

The loss of any member of the Resulting Issuer's management team, could have a material adverse effect on its business and results of operations. In addition, an inability to hire, or the increased costs of new personnel, including members of executive management, could have a material adverse effect on the Resulting Issuer's business and operating results. At present and for the near future, Blueberries will depend upon a relatively small number of employees to develop, market, sell and support its products. The expansion of marketing and sales of its products will require Blueberries to find, hire and retain additional capable employees who can understand, explain, market and sell its products. There is intense competition for capable personnel in all of these areas and Blueberries may not be successful in attracting, training, integrating, motivating, or retaining new personnel, vendors, or subcontractors for these required functions. New employees often require significant training and, in many cases, take significant time before they achieve full productivity. As a result, the Resulting Issuer may incur significant costs to attract and retain employees, including significant expenditures related to salaries and benefits and compensation expenses related to equity awards, and may lose new employees to its competitors or other companies before it realizes the benefit of its investment in recruiting and training them. In addition, as the Resulting Issuer moves into new jurisdictions, it will need to attract and recruit skilled employees in those areas.

Legal Proceedings

From time to time, Blueberries may be a party to legal and regulatory proceedings, including matters involving governmental agencies, entities with whom it does business and other proceedings arising in the ordinary course of business. Blueberries will evaluate its exposure to these legal and regulatory proceedings and establish reserves for

the estimated liabilities in accordance with generally accepted accounting principles. Assessing and predicting the outcome of these matters involves substantial uncertainties. Unexpected outcomes in these legal proceedings, or changes in management's evaluations or predictions and accompanying changes in established reserves, could have an adverse impact on Blueberries' financial results.

Regulatory Compliance Risks

Achievement of Blueberries' business objectives is contingent, in part, upon compliance with regulatory requirements enacted by governmental authorities and obtaining all regulatory approvals, where necessary, for the sale of its products. Blueberries may not be able to obtain or maintain the necessary licenses, permits, quotas, authorizations or accreditations, or may only be able to do so at great cost, to operate its business. Blueberries cannot predict the time required to secure all appropriate regulatory approvals for its products, or the extent of testing and documentation that may be required by local governmental authorities. The impact of the compliance regime, any delays in obtaining, or failure to obtain or keep the regulatory approvals may significantly delay or impact the development of markets, products and sales initiatives and could have a material adverse effect on the business, results of operations and financial condition of Blueberries.

The officers and directors of Blueberries must rely, to a great extent, on Blueberries' Colombian legal counsel and local consultants retained by Blueberries in order to keep abreast of material legal, regulatory and governmental developments as they pertain to and affect Blueberries' business operations, and to assist Blueberries with its governmental relations. Blueberries must rely, to some extent, on those members of management and the board who have previous experience working and conducting business in Colombia in order to enhance its understanding of and appreciation for the local business culture and practices in Colombia.

Blueberries also relies on the advice of local experts and professionals in connection with current and new regulations that develop in respect of banking, financing and tax matters in Colombia. Any developments or changes in such legal, regulatory or governmental requirements or in local business practices in Colombia are beyond the control of Blueberries and may adversely affect its business.

Blueberries will incur ongoing costs and obligations related to regulatory compliance. Failure to comply with applicable laws, regulations and permitting requirements may result in enforcement actions thereunder, including orders issued by regulatory or judicial authorities causing operations to cease or be curtailed, and may include corrective measures requiring capital expenditures, installation of additional equipment, or remedial actions. Blueberries may be required to compensate those suffering loss or damage by reason of its operations and may have civil or criminal fines or penalties imposed for violations of applicable laws or regulations. In addition, changes in regulations, more vigorous enforcement thereof or other unanticipated events could require extensive changes to Blueberries' operations, increased compliance costs or give rise to material liabilities, which could have a material adverse effect on the business, results of operations and financial condition of Blueberries.

Canadian Regulatory and Civil Proceedings

The sale and distribution of cannabis products for medicinal use by licensed producers is legal in certain Canadian provinces. The Canadian federal government legalized marijuana effective October 17, 2018.

Blueberries operates in Colombia pursuant to the Blueberries Licenses and authorizations granted by the Ministry of Justice and the Ministry of Health. Consequently, certain activities conducted by Blueberries are permissible under one regulatory regime while not under another. In the past, Canadian courts and regulatory authorities have taken the view that it is not contrary to Canadian federal or provincial law for a person to be engaged in, or for an entity to hold interests in affiliates that are engaged in, certain regulated activities where such activities may be regulated differently than in the home jurisdictions and have enforced extra-territorial laws even where such laws (or regulatory regimes applicable to certain activities or industries) differs from those in the Canadian jurisdiction. There is a risk however that the Canadian courts or applicable Canadian or other governmental authorities may take a contrary view with respect to the business of Blueberries and view Blueberries as having violated their local laws, despite Blueberries having obtained all applicable Colombian licenses or authorizations and despite that Blueberries does not carry on business in Canada. Therefore, there is a risk that civil and criminal proceedings, including class actions, could be initiated against Blueberries. Such potential proceedings could involve substantial litigation expense, penalties, fines, seizure of assets, injunctions or other restrictions being imposed upon Blueberries or its business partners, while diverting the attention of key executives. Such proceedings could have a material adverse effect on Blueberries' business, revenues, operating results and financial condition as well as impact upon Blueberries' reputation.

Change of Cannabis Laws, Regulations and Guidelines

Cannabis laws and regulations are dynamic and subject to evolving interpretations which could require Blueberries to incur substantial costs associated with compliance or alter certain aspects of its business plan. It is also possible that

regulations may be enacted in the future that will be directly applicable to certain aspects of Blueberries' businesses. Blueberries cannot predict the nature of any future laws, regulations, interpretations or applications, nor can it determine what effect additional governmental regulations or administrative policies and procedures, when and if promulgated, could have on Blueberries' business. Management expects that the legislative and regulatory environment in the cannabis industry in Colombia and internationally will continue to be dynamic and will require innovative solutions to try to comply with this changing legal landscape in this nascent industry for the foreseeable future. Compliance with any such legislation may have a material adverse effect on Blueberries' business, financial condition and results of operations.

Public opinion can also exert a significant influence over the regulation of the cannabis industry. A negative shift in the public's perception of the cannabis industry could affect future legislation or regulation in different jurisdictions.

Reliance on Blueberries Licenses and Authorizations

Blueberries' ability to grow, store and sell cannabis in Colombia is dependent on Blueberries' ability to sustain and/or obtain the necessary licenses and authorizations by certain authorities in Colombia.

The pending licenses and authorizations are subject to ongoing compliance and reporting requirements and the ability of Blueberries to obtain, sustain or renew any such licenses and authorizations on acceptable terms is subject to changes in regulations and policies and to the discretion of the applicable authorities or other governmental agencies in foreign jurisdictions. Failure to comply with the requirements of the licenses or authorizations or any failure to maintain the licenses or authorizations would have a material adverse impact on the business, financial condition and operating results of Blueberries.

Although Blueberries believes that it will meet the requirements to obtain, sustain or renew the necessary licenses and authorizations, there can be no guarantee that the applicable authorities will issue these licenses or authorizations. Should the authorities fail to issue the necessary licenses or authorizations, Blueberries may be curtailed or prohibited from the production and/or distribution of cannabis or from proceeding with the development of its operations as currently proposed and the business, financial condition and results of the operation of Blueberries may be materially adversely affected.

Reliance on One Facility

The cultivation facility is currently only licensed facility under the Licenses. The Licenses held by Blueberries are specific to the Cultivation Facility. Adverse changes or developments affecting the cultivation facility, including but not limited to a breach of security, could have a material and adverse effect on Blueberries' business, financial condition and prospects. Any breach of the security measures and other facility requirements, including any failure to comply with recommendations or requirements arising from inspections by Colombian regulatory authorities, could have an impact on Blueberries' ability to receive or hold the licenses.

Certain contemplated capital expenditures of Blueberries may require approval of Colombian regulatory authorities. There is no guarantee that Colombian Regulatory Authorities will approve any contemplated expansion and/or renovation, which could adversely affect the business, financial condition and results of Blueberries' operations.

Unexpected disruptions affecting operations, whether due to labor disruptions, supply disruptions, power disruptions, damage to equipment or otherwise

Blueberries' operations may be disrupted by a variety of risks and hazards that are beyond its control, including, but not limited to, fires, power outages, labour disruptions, supply disruptions, flooding, and the inability to obtain suitable or adequate machinery, equipment or labour as well as other risks involved in the cultivation and production of medicinal cannabis.

Demand for Cannabis and Derivative Products

The legal cannabis industry in Colombia is at an early stage of its development. Consumer perceptions regarding legality, morality, consumption, safety, efficacy and quality of medicinal cannabis are mixed and evolving and can be significantly influenced by scientific research or findings, regulatory investigations, litigation, media attention and other publicity regarding the consumption of medicinal cannabis products. There can be no assurance that future scientific research, findings, regulatory proceedings, litigation, media attention or other research findings or publicity will be favourable to the medicinal cannabis market or any particular product, or consistent with earlier publicity. Future research reports, findings, regulatory proceedings, litigation, media attention or other publicity that are perceived as less favourable than, or that question, earlier research reports, findings or publicity could have a material adverse effect on the demand for medicinal cannabis and on the business, results of operations, financial condition and cash flows of Blueberries. Further, adverse publicity reports or other media attention regarding cannabis in general, or associating

the consumption of medicinal cannabis with illness or other negative effects or events, could have such a material adverse effect. Public opinion and support for medicinal cannabis use has traditionally been inconsistent and varies from jurisdiction to jurisdiction. While public opinion and support appears to be rising for legalizing medicinal cannabis, it remains a controversial issue subject to differing opinions surrounding the level of legalization. Blueberries' ability to gain and increase market acceptance of its business may require substantial expenditures on investor relations, strategic relationships and marketing initiatives. There can be no assurance that such initiatives will be successful and their failure may have an adverse effect on Blueberries.

Liability, Enforcement, Complaints, etc.

Blueberries' participation in the cannabis industry may lead to litigation, formal or informal complaints, enforcement actions, and inquiries by third parties, other companies and/or various governmental authorities against Blueberries. Litigation, complaints, and enforcement actions involving Blueberries could consume considerable amounts of financial and other corporate resources, which could have an adverse effect on Blueberries' future cash flows, earnings, results of operations and financial condition.

Product Liability

As a distributor of products designed to be ingested by humans, Blueberries faces an inherent risk of exposure to product liability claims, regulatory action and litigation if its products are alleged to have caused damages, loss or injury. In addition, the sale of Blueberries' products involve the risk of injury to consumers due to tampering by unauthorized third parties or product contamination. Adverse reactions resulting from human consumption of Blueberries' products alone or in combination with other medications or substances could occur. Blueberries may be subject to various product liability claims, including, among others, that Blueberries' products caused injury or illness, include inadequate instructions for use or include inadequate warnings concerning health risks, possible side effects or interactions with other substances. A product liability claim or regulatory action against Blueberries could result in increased costs, could adversely affect Blueberries' reputation with its clients and consumers generally, and could have a material adverse effect on the results of operations and financial condition of Blueberries. There can be no assurances that Blueberries will be able to obtain or maintain product liability insurance on acceptable terms or with adequate coverage against potential liabilities. Such insurance is expensive and may not be available in the future on acceptable terms, or at all. The inability to obtain sufficient insurance coverage on reasonable terms or to otherwise protect against potential product liability claims could prevent or inhibit the commercialization of Blueberries' potential products.

Insurance Coverage

Blueberries' production is, in general, subject to different risks and hazards, including adverse weather conditions, fires, plant diseases and pest infestations, other natural phenomena, industrial accidents, labour disputes, changes in the legal and regulatory framework applicable to Blueberries and environmental contingencies.

Blueberries is in the process of obtaining additional insurance coverage over Blueberries' growing production and facilities. Blueberries is seeking insurance against a variety of risks, including losses and damages relating to its plants, equipment and buildings. Any insurance that Blueberries is successful in obtaining may only cover part of the losses it may incur and may not cover losses on crops due to drought or floods. Furthermore, certain types of risks may not be covered by the future policies. There is a risk that any claims to be paid by an insurer due to the occurrence of a casualty covered may not be sufficient to compensate Blueberries for all of the damages suffered. Blueberries may not be able to maintain or obtain insurance of the type and amount desired at a reasonable cost. If Blueberries were to incur significant liability for which it were not fully insured, it could have a materially adverse effect on Blueberries' business, financial condition and results of operations.

Ability to Establish and Maintain Bank Accounts

While Blueberries does not anticipate dealing with banking restrictions, there is a risk that banking institutions in countries where Blueberries operates will not accept payments related to the cannabis industry. Such risks could increase costs for Blueberries. In the event financial service providers do not accept accounts or transactions related to the cannabis industry, it is possible that Blueberries may be required to seek alternative payment solutions, including but not limited to cryptocurrencies such as Bitcoin. There are risks inherent in cryptocurrencies, most notably its volatility and security issues. If the industry was to move towards alternative payment solutions and accept payments in cryptocurrency Blueberries would have to adopt policies and protocols to manage its volatility and exchange rate risk exposures. Blueberries' inability to manage such risks may adversely affect Blueberries' operations and financial performance.

Product Recalls

Manufacturers and distributors of products are sometimes subject to the recall or return of their products for a variety of reasons, including product defects, such as contamination, unintended harmful side effects or interactions with other

substances, packaging safety and inadequate or inaccurate labelling disclosure. If any of Blueberries' products are recalled due to an alleged product defect or for any other reason, Blueberries could be required to incur the unexpected expense of the recall and any legal proceedings that might arise in connection with the recall. Blueberries may lose a significant amount of sales and may not be able to replace those sales at an acceptable margin or at all. In addition, a product recall may require significant management attention. Although Blueberries has detailed procedures in place for testing its products, there can be no assurance that any quality, potency or contamination problems will be detected in time to avoid unforeseen product recalls, regulatory action or lawsuits. Additionally, if Blueberries is subject to recall, the image of Blueberries could be harmed. A recall for any of the foregoing reasons could lead to decreased demand for Blueberries' products and could have a material adverse effect on the results of operations and financial condition of Blueberries. Additionally, product recalls may lead to increased scrutiny of Blueberries' operations by regulatory agencies, requiring further management attention, potential loss of applicable licenses and potential legal fees and other expenses.

Risks Inherent in an Agricultural Business

Blueberries' business involves the growing of blueberries with the prospect of growing cannabis in the future. Both of which are agricultural products and grown outdoors. The occurrence of severe adverse weather conditions, especially droughts, hail, floods or frost, is unpredictable and may have a potentially devastating impact on agricultural production and may otherwise adversely affect the supply of cannabis. Adverse weather conditions may be exacerbated by the effects of climate change and may result in the introduction and increased frequency of pests and diseases. The effects of severe adverse weather conditions may reduce Blueberries' yields or require Blueberries to increase its level of investment to maintain yields. Additionally, higher than average temperatures and rainfall can contribute to an increased presence of insects and pests, which could negatively affect crops. Future droughts could reduce the yield and quality of Blueberries' production, which could materially and adversely affect Blueberries' business, financial condition and results of operations.

The occurrence and effects of plant disease, insects and pests can be unpredictable and devastating to agricultural, potentially rendering all or a substantial portion of the affected harvests unsuitable for sale. Even when only a portion of the production is damaged, Blueberries' results of operations could be adversely affected because all or a substantial portion of the production costs may have been incurred. Although some plant diseases are treatable, the cost of treatment can be high and such events could adversely affect Blueberries' operating results and financial condition. Furthermore, if Blueberries fails to control a given plant disease and the production is threatened, Blueberries may be unable to supply its customers, which could adversely affect its business, financial condition and results of operations. There can be no assurance that natural elements will not have a material adverse effect on any such production.

Risks Inherent in Rural Real Estate

The Colombian Constitution protects the right to own private property and related rights acquired in compliance with civil regulations. According to Colombian Constitution, legally acquired private property ownership rights cannot be affected if the owner is in compliance with applicable laws.

Except in the case of public necessity or social interest, subject to due process and the payment of an indemnification, expropriations without just cause or on a discriminatory basis are restricted.

In August 2011, Colombia and Canada entered into a Free Trade Agreement (CCOFTA), which outlines the issue of expropriations in Article 811 as well as dispute settlements in Chapter 21. The Free Trade Agreement provides that Canadian investments in Colombia will be granted fair and equitable treatment with full protection and security and will be accorded no less favourable treatment than Colombia grants to its own investors or investors of any other country. It also provides that an investment will not be expropriated except in a nondiscriminatory manner in accordance with due process of law with prompt and adequate compensation. The expropriation provisions cover both traditional "direct" takings and so-called "indirect" or "creeping" expropriation, which results from a measure or a series of measures by a government that have an effect equivalent to direct expropriation without a formal transfer of title or outright seizure of the investment. An investor-state dispute resolution process is provided for in the event that the investment is not provided the protections set out in the CCOFTA. Through this process, a Canadian investor can challenge a Colombian measure through binding international arbitration instead of relying on the Colombian local courts.

Energy Prices and Supply

Blueberries requires substantial amounts of electric energy and other resources for its harvest activities and transport of cannabis. Blueberries relies upon third parties for its supply of energy resources used in its operations. The prices for and availability of energy resources may be subject to change or curtailment, respectively, due to, among other things, new laws or regulations, imposition of new taxes or tariffs, interruptions in production by suppliers, imposition of restrictions on energy supply by government, worldwide price levels and market conditions. If energy supply is cut for

an extended period of time and Blueberries is unable to find replacement sources at comparable prices, or at all, Blueberries' business, financial condition and results of operations would be materially and adversely affected.

Supply of Cannabis Seeds

If for any reason the supply of cannabis seeds is ceased or delayed, Blueberries would have to seek alternate suppliers and obtain all necessary authorization for the new seeds. If replacement seeds cannot be obtained at comparable prices, or at all, or if the necessary authorizations are not obtained, Blueberries' business, financial condition and results of operations would be materially and adversely affected.

Changes in Corporate Structure

Colombian cannabis licenses are granted on a non-transferable, non-exchangeable and non-assignable basis. Any breach of this restriction may give rise to unilateral termination of the license by the governmental authority.

Notwithstanding the above, Colombian laws do not provide for specific regulations or restrictions regarding the effects of a change in control, modification of the corporate structure, issuance of shares, or any changes in holders or final beneficiaries of cannabis licenses.

Colombian legislation gives special attention to the identification and background of the legal representatives of licensees. Licensees must file a declaration of the legality of the proceeds of the legal representatives. Furthermore, Decree 613 of 2017 provides a set of resolutive conditions, which enable the Ministry of Health or the Ministry of Justice, as applicable, to terminate a license if the licensee fails to request the amendment of the license within 30 calendar days following any changes in (i) the legal representation of the licensee; or (ii) the declaration that a legal representative is criminally liable for drug trafficking or related crimes, after having issued the respective license.

Emerging Market Risks

Emerging market investment generally poses a greater degree of risk than investment in more mature market economies because the economies in the developing world are more susceptible to destabilization resulting from domestic and international developments.

All of Blueberries' operations are in Colombia. Colombia has a history of economic instability or crises (such as inflation or recession). While there is no current political instability, and historically there has been no change in laws and regulations, this is subject to change in the future and could adversely affect Blueberries' business, financial condition, and results of operations.

Fluctuations in the Colombian economy and actions adopted by the Government of Colombia have had and may continue to have a significant impact on companies operating in Colombia, including Blueberries. Specifically, Blueberries may be affected by inflation, foreign currency fluctuations, regulatory policies, business, and tax regulations and in general, by the political, social and economic scenarios in Colombia and in other countries that may affect Colombia.

Global economic crises could negatively affect investor confidence in emerging markets or the economies of the principal countries in Latin America, including Colombia. Such events could materially and adversely affect Blueberries' business, financial condition and results of operations.

Global Economy

Financial and securities markets in Colombia are influenced by the economic and market conditions in other countries, including other South American and emerging market countries and other global markets. Although economic conditions in these countries may differ significantly from economic conditions in Colombia, investors' reactions to developments in these other countries, such as the recent developments in the global financial markets, may substantially affect the capital flows into, and the market value of securities of issuers with operations in Colombia.

An economic downturn or volatility could have a material adverse effect on Blueberries' business, financial condition and results of operations. The economy of the Colombia, where Blueberries' operations are located, has experienced significant economic uncertainty and volatility during recent years. A weakening of economic conditions could lead to reductions in demand for Blueberries' products. For example, its revenues can be adversely affected by high unemployment and other economic factors. Further, weakened economic conditions or a recession could reduce the amount of income customers are able to spend on Blueberries' products. In addition, as a result of volatile or uncertain economic conditions, Blueberries may experience the negative effects of increased financial pressures on its clients. For instance, Blueberries' business, financial condition and results of operations could be negatively impacted by

increased competitive pricing pressure, which could result in Blueberries incurring increased bad debt expense. If Blueberries is not able to timely and appropriately adapt to changes resulting from a weak economic environment, its business, results of operations and financial condition may be materially and adversely affected.

A crisis in other emerging market countries could dampen investor enthusiasm for securities of issuers with South American operations. Financial conditions in Argentina, Brazil or other emerging market countries could negatively impact Colombia's economy in the future. If such fluctuations were to occur, Blueberries' business, financial condition and results of operations could be materially and adversely affected.

CSE Restrictions on Business

As a condition to initially listing on the CSE, the CSE required that Blueberries deliver an undertaking (the "Undertaking") confirming that, while listed on CSE, Blueberries will only conduct the business of the production, sale and distribution of medicinal marijuana in Colombia pursuant to the Licenses and in accordance with applicable law, unless prior approval is obtained from CSE. The Undertaking could have an adverse effect on Blueberries' ability to do business or operate outside of Colombia and on its ability to expand its business into other areas, including the provision of non-medical marijuana in the event that the laws were to change to permit such sales, if Blueberries is still listed on the CSE and remains subject to the Undertaking at such time. The Undertaking may prevent Blueberries from expanding into new areas of business when Blueberries' competitors have no such restrictions. All such restrictions could materially and adversely affect the growth, business, financial condition and results of Blueberries' operations.

Risks Related to Investment in a Colombian Company

Operational Risks

Operations in Colombia are subject to risk due to the potential for social, political, economic, legal and fiscal instability. The government in Colombia faces ongoing problems including but not limited to inflation, unemployment and inequitable income distribution. Colombia is also home to South America's largest and longest running insurgency and large swaths of the countryside are under guerrilla influence. In addition, Colombia experiences narcotics-related violence, a prevalence of kidnapping and extortionist activities and civil unrest in certain areas of the country. Such instability may require Blueberries to suspend operations on its properties. Although Blueberries is not presently aware of any circumstances or facts which may cause the following to occur, other risks may involve matters arising out of the evolving laws and policies in Colombia, any future imposition of special taxes or similar charges, as well as foreign exchange fluctuations and currency convertibility and controls, the unenforceability of contractual rights or the taking or nationalization of property without fair compensation, restrictions on the use of expatriates in Blueberries' operations, or other matters. Blueberries also bears the risk that changes can occur in the government of Colombia and a new government may void or change the laws and regulations that Blueberries is relying upon.

Currently there are no restrictions on the repatriation from Colombia of earnings to foreign entities and Colombia has never imposed such restrictions. However, there can be no assurance that restrictions on repatriation of earnings from Colombia will not be imposed in the future. Exchange control regulations require that any proceeds in foreign currency originated on exports of goods from Colombia (including minerals) be repatriated to Colombia. However, purchase of foreign currency is allowed through any Colombian authorized financial entities for purposes of payments to foreign suppliers, repayment of foreign debt, payment of dividends to foreign stockholders and other foreign expenses.

Inflation in Colombia

Colombia has in the past experienced double-digit rates of inflation. If Colombia experiences substantial inflation in the future, Blueberries' costs in Colombian peso terms will increase significantly, subject to movements in applicable exchange rates. Inflationary pressures may also curtail Blueberries' ability to access global financial markets in the longer term and its ability to fund planned capital expenditures, and could materially adversely affect Blueberries' business, financial condition and results of operations. The Colombian government's response to inflation or other significant macro-economic pressures may include the introduction of policies or other measures that could increase Blueberries' costs, reduce operating margins and materially adversely affect its business, financial condition and results of operations.

Operations in Spanish

As a result of Blueberries conducting its operations in Colombia, the books and records of Blueberries, including key documents such as material contracts and financial documentation are principally negotiated and entered into in the Spanish language and English translations may not exist or be readily available.

Enforcement of Judgments

Blueberries is incorporated under the laws of Canada; however all of its assets are located outside Canada. Furthermore, many of Blueberries' directors and officers reside outside Canada. As a result, investors may not be able

to effect service of process within Canada upon Blueberries' directors or officers or enforce against them in Canadian courts judgments predicated on Canadian securities laws. Likewise, it may also be difficult for an investor to enforce in Canadian courts judgments obtained against these persons in courts located in jurisdictions outside Canada.

As a result of the above, public shareholders may have more difficulty in protecting their interests in the face of actions taken by management, members of the Board or controlling shareholders than they would as public shareholders of a Canadian company.

Financial and Accounting Risks

Access to Capital

In executing its business plan, Blueberries makes, and will continue to make, substantial investments and other expenditures related to acquisitions, research and development and marketing initiatives. Since its incorporation, Blueberries has financed these expenditures through offerings of its equity securities. Blueberries will have further capital requirements and other expenditures as it proceeds to expand its business or take advantage of opportunities for acquisitions or other business opportunities that may be presented to it. Blueberries may incur major unanticipated liabilities or expenses. Blueberries can provide no assurance that it will be able to obtain financing to meet the growth needs of Blueberries.

Foreign Sales

Blueberries' functional currency is denominated in Canadian dollars. Blueberries currently expects that sales will be denominated in Colombian pesos and may, in the future, have sales denominated in the currencies of additional countries in which it establishes sales offices. In addition, Blueberries incurs the majority of its operating expenses in Colombia Pesos. In the future, the proportion of Blueberries' sales that are international may increase. Such sales may be subject to unexpected regulatory requirements and other barriers. Any fluctuation in the exchange rates of foreign currencies may negatively impact the Resulting Issuer's business, financial condition and results of operations. Blueberries has not previously engaged in foreign currency hedging. If the Resulting Issuer decides to hedge its foreign currency exposure, it may not be able to hedge effectively due to lack of experience, unreasonable costs or illiquid markets. In addition, those activities may be limited in the protection they provide the Resulting Issuer from foreign currency fluctuations and can themselves result in losses.

Estimates or Judgments Relating to Critical Accounting Policies

The preparation of financial statements in conformity with International Financial Reporting Standards, or IFRS, requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Blueberries bases its estimates on historical experience and on various other assumptions that it believes to be reasonable under the circumstances, as provided in the notes to the Blueberries Financial Statements, the results of which form the basis for making judgments about the carrying values of assets, liabilities, equity, revenue and expenses that are not readily apparent from other sources. Blueberries' operating results may be adversely affected if the assumptions change or if actual circumstances differ from those in the assumptions, which could cause Blueberries' operating results to fall below the expectations of securities analysts and investors, resulting in a decline in the share price of the Resulting Issuer. Significant assumptions and estimates used in preparing the financial statements include those related to the credit quality of accounts receivable, income tax credits receivable, share based payments, impairment of non-financial assets, fair value of biological assets, as well as revenue and cost recognition.

Tax Risks

The Resulting Issuer will operate and will be subject to income tax and other forms of taxation (which are not based upon income) in multiple tax jurisdictions. Taxation laws and rates which determine taxation expenses may vary significantly in different jurisdictions, and legislation governing taxation laws and rates is also subject to change. Therefore, the Resulting Issuer's earnings may be impacted by changes in the proportion of earnings taxed in different jurisdictions, changes in taxation rates, changes in estimates of liabilities and changes in the amount of other forms of taxation. The Resulting Issuer may have exposure to greater than anticipated tax liabilities or expenses. The Resulting Issuer will be subject to income taxes and non-income taxes in a variety of jurisdictions and its tax structure is subject to review by both domestic and foreign taxation authorities and the determination of the Resulting Issuer's provision for income taxes and other tax liabilities will require significant judgment.

The Resulting Issuer will be subject to different taxes imposed by the Colombian government and any changes within such tax legal and regulatory framework may have an adverse effect on our financial results. All current tax legislation is a matter of public record and the Resulting Issuer will be unable to predict which additional legislation or amendments may be enacted.

DISCLOSURE OF INTERNAL CONTROLS

Management has established processes to provide sufficient knowledge to support representations that it has exercised reasonable diligence that (i) the financial statements do not contain any untrue statement of material fact or omit to state a material fact required to be stated or that is necessary to make a statement not misleading in light of the circumstances under which it is made, as of the date of and for the periods presented in the financial statements, and (ii) the financial statements fairly present in all material respects the financial condition, results of operations and cash flows of the Company, as of the date of and for the periods presented.

The Company utilizes the Venture Issuer Basic Certificate, which certificate does not include representations related to the establishment and maintenance of disclosure controls and procedures (“DC&P”) or internal control over financial reporting (“ICFR”), as defined in NI 52-109. In particular, the certifying officers do not make any representations related to the establishment and maintenance of:

- i) controls and other procedures designed to provide reasonable assurance that information required to be disclosed by the issuer in its annual filings, interim filings or other reports filed or submitted under securities legislation is recorded, processed, summarized and reported within the time periods specified in securities legislation; and
- ii) a process to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with the issuer’s GAAP.

Investors should be aware that inherent limitations on the ability of certifying officers of a venture issuer to design and implement on a cost effective basis DC&P and ICFR as defined in NI 52-109 may result in additional risks to the quality, reliability, transparency and timeliness of interim and annual filings and other reports provided under securities legislation.

NON-GAAP MEASURES

Certain financial measures in this document do not have a standardized meaning as prescribed by IFRS and therefore are considered non-GAAP measures. These measures may not be comparable to similar measures presented by other issuers. These measures have been described and presented in order to provide shareholders and potential investors with additional measures for analyzing our ability to generate funds to finance our operations and information regarding our liquidity. The additional information should not be considered in isolation or as a substitute for measures prepared in accordance with IFRS. The definition and reconciliation of each non-GAAP measure is presented in the Discussion of Operations and Liquidity and Capital Resources sections of this MD&A.

CAUTIONARY NOTE REGARDING FORWARD-LOOKING STATEMENTS

This MD&A contains certain forward-looking information and forward-looking statements, as defined in applicable securities laws (collectively referred to herein as “forward-looking statements”). These statements relate to future events or the Company’s future performance. All statements other than statements of historical fact are forward-looking statements. Often, but not always, forward-looking statements can be identified by the use of words such as “plans”, “expects”, “is expected”, “budget”, “scheduled”, “estimates”, “continues”, “forecasts”, “projects”, “predicts”, “intends”, “anticipates” or “believes”, or variations of, or the negatives of, such words and phrases, or state that certain actions, events or results “may”, “could”, “would”, “should”, “might” or “will” be taken, occur or be achieved. Forward-looking statements involve known and unknown risks, uncertainties and other factors that may cause actual results to differ materially from those anticipated in such forward-looking statements. The forward-looking statements in this MD&A speak only as of the date of this MD&A or as of the date specified in such statement. The following table outlines certain significant forward-looking statements contained in this MD&A and provides the material assumptions used to develop such forward-looking statements and material risk factors that could cause actual results to differ materially from the forward-looking statements.

Forward Looking Statements	Assumptions	Risk Factors
The Company will be able to continue its business activities.	The Company has anticipated all material costs and the operating activities of the Company, and such costs and activities will be consistent with the Company’s current expectations; the Company will be able to obtain equity funding when required.	COVID-19 caused closures and other unforeseen costs to the Company will arise; any particular operation cost increase or decrease from the date of the estimation; and due to COVID-19 capital markets not being favourable for funding resulting in the Company not being

Forward Looking Statements	Assumptions	Risk Factors
		able to obtain financing when required or on acceptable terms.
The Company will be able to carry out anticipated business plans.	In the next twelve months, the operating activities of the Company will be consistent with the Company's current expectations; debt and equity markets, interest rates and other applicable economic conditions are favourable to the Company.	COVID-19 related uncertainty continuing; sufficient funds not being available; increases in costs, the Company may be unable to retain key personnel to develop or enhance its business, take advantage of future opportunity or respond to competitive pressures.
Management's outlook regarding future trends.	Financing will be available for the Company's future business, continuing development, and maintenance of operations.	COVID-19 situation and general economic conditions could adversely impact spending by the Company's clients, put downward pressure on prices which could adversely impact the business, financial condition or results of operations and the Company may be unable to retain personnel.

Inherent in forward-looking statements are risks, uncertainties and other factors beyond the Company's ability to predict or control. Please also make reference to those risk factors discussed further below. Readers are cautioned that the above chart does not contain an exhaustive list of the factors or assumptions that may affect the forward-looking statements, and that the assumptions underlying such statements may prove to be incorrect. Actual results and developments are likely to differ, and may differ materially, from those expressed or implied by the forward-looking statements contained in this MD&A.

Forward-looking statements involve known and unknown risks, uncertainties and other factors that may cause the Company's actual results, performance, or achievements to be materially different from any of its future results, performance or achievements expressed or implied by forward-looking statements. All forward-looking statements herein are qualified by this cautionary statement. Accordingly, readers should not place undue reliance on forward-looking statements. The Company undertakes no obligation to update publicly or otherwise revise any forward-looking statements whether as a result of new information or future events or otherwise, except as may be required by law. If the Company does update one or more forward looking statements, no inference should be drawn that it will make additional updates with respect to those or other forward-looking statements, unless required by law.
